Data Centers pose a complex set of issues that must be thoroughly studied before permitting building. MoCo residents like me are concerned about the toll on, and cost of, our energy, water, and climate, from the build out of data centers in our communities. We deserve to be heard. The State is just beginning a study of data centers. The affordability crisis is directly tied to data center capacity. What is the rush to jump in and allow large scale data centers here? There is every reason to wait, particularly with a project with unknown impacts speeding toward approval with no regulations. Slow down - get this right.
