

Laura O'Brien  
Silver Spring, MD

As a county that has historically led the way in terms of thoughtful, inclusive planning, it is paramount that we do not rush in to building out data centers without fully understanding and evaluating the risks that are likely to threaten the health of humans and natural resources. It is alarming that we are allowing plans for 5 hyperscale data centers that plan to draw water from the Potomac to advance without considering the true risks. Please enact a moratorium as soon as possible and set about a transparent process to understand and regulate data centers here.
