

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Marianne Starr

Potomac, MD

A moratorium is desperately needed on data centers in Montgomery County. The Potomac River is a water source for many residents (like myself). How will the river be affected by the data centers' use of MILLIONS OF GALLONS for cooling? Who will pay for the energy these centers demand? Montgomery County residents are already significantly hurting from the Trump/DOGE layoffs and firings, and more. I implore you to proceed carefully and discuss with other counties and states the pros and cons, the potential and realized damage.

Thank You,

Marianne starr
