Please don't rush through the process of allowing data centers in Montgomery County. There are a lot of things I am concerned about and need to know more information, particularly the use of Potomac River water. If data centers are right for Montgomery County now, they will be right for the county in 6-12 months when a transparent public process has made a full accounting of where and how data centers can be sited to complement the county's goals - and the biggest question - who pays? Good leadership proceeds carefully and in collaboration. Thank you!
