

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Mary Nyamweya
Silver Spring, MD

We've just found out that the proposed project in Dickerson will use 2 million gallons of the Potomac River per day. This is not okay during this time of climate crisis, with our increasingly drought-filled summers. Until we can answer all the questions that arise around our County and state resources and data centers, a moratorium needs to be put in place - and quickly. We can't go back and add regulations to the project in Dickerson which seems to be speeding toward approval. Please include my comments in the hearing record.

Thank You,

Mary Nyamweya
