

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Patricia Devlin

Rockville, MD

I have grave concerns with the development of data centers in Montgomery County as they require a vast amount of electricity and water to maintain at great expense.

I strongly encourage the Council to take the time to provide its taxpayers a full accounting of where and how data centers can be sited to complement the county's goals - and the biggest question - who pays?

Please include my comments in the hearing record.

Thank You,

Patricia Devlin
