

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Roxanne Russell

Bethesda, MD

I am deeply concerned about the proliferation of data centers without sufficient study as to their impacts on our environment. Especially plans to build centers that will pull water from the Potomac River. Please support measures to curtail new development until serious studies have been undertaken and presented to the public for consideration. Thank you.

Thank You,

Roxanne Russell
