Susan Pearcy
Barnesville, MD

Please carefully consider a moratorium on the onslaught of data centers in Montgomery County before years from now you regret your decision to move forward.

 I'm concerned especially about the cluster of 5 data centers proposed in Dickerson that would use an astounding 2 million gallons of water PER DAY!

 Water is a precious commodity out here in the Ag Reserve (and everywhere for that matter).

 Please also consider the health risks, all of which are not yet known.

 You can make a difference. Please do the right thing and take time to make the right decision.

 Thank you,

Susan Pearcy
