

Testimony on ZTA 26-01 Data Center Commercial Uses - Data Center

February 26, 2026

Taylor Smith

I am deeply concerned about the land use implications of data centers in Montgomery County. We need a transparent public process with full accounting of where and how data centers can be sited, who profits, and who doesn't. I am deeply concerned about the environmental impacts without more data. Zoning and land use rules can't be broken for some without being broken for all, so how will this impact our county as a whole?

Thank You,

Taylor Smith
