14: About Budget Billing:

- Budget billing is an option provided by utility companies to help spread out annual utility bills into even monthly payments.
- Monthly payments are determined by the utility company based upon an average of your last twelve months usage.
- Your utility bill will explain how much you have paid for the year, compared to how much you have used.
- This will help determine if you are using more (or less) than the budgeted amount.
- You may contact your utility company to request an estimate of your budgeted amount, and to learn more about budget billing.
- This information may help you to decide if you'd like to apply for a EUSP benefit.
- You may make additional payments as needed. You may contact your utility company if you feel your budget is underfunded.
