OFFICE OF THE COUNTY EXECUTIVE  
ROCKVILLE, MARYLAND 20850

Isiah Leggett  
County Executive

April 2011

Dear Friends,

This year, introducing the *Register of Champion Trees* for Montgomery County is a great honor. The United Nations declared 2011 as the International Year of Forests, and the United States Forest Service is celebrating its 100<sup>th</sup> anniversary. This year's Register includes several new county champions as well as some of the largest trees in Maryland such as the American sycamore, picturesque trees like the black tupelo, and small giants like the umbrella magnolia.

Like the trees themselves, the efforts of our residents who nominate potential champions, the members of the Forestry Board who measure and catalog these trees, and the owners who care for them merit much appreciation. I am grateful to all people involved in fostering stewardship for these Champions, individual trees, and forests everywhere.

In this International Year of the Forests, and in these difficult budget times, we encourage you to look inside this year's Register of Champion Trees for opportunities for you to become involved in the stewardship of our forests and trees. And in this 100<sup>th</sup> anniversary year of the United States Forest Service, I urge you to take a moment to observe the beauty of the changing trees around you. Arbor Day will bring new growth... Flourishing canopies will cast deep shade to cool us on hot summer days... Autumn leaves will provide a marvelous show of color, as well as a new blanket of nutrients... And the skeletons of dormant trees will create beautiful silhouettes on wintry days.

Enjoy and treasure our forest and tree resources. And enjoy the 2011 Montgomery County Champion Trees.

Sincerely,

Isiah Leggett  
County Executive

## 2011 Marks the 100<sup>th</sup> Anniversary of the US Forest Service

The Forest Service is celebrating the 100th anniversary of one of the most successful land conservation efforts in the U.S. The Weeks Act was signed into law in 1911, after a decade-long debate about the role of the federal government in protecting forestlands. The Weeks Act, named after Massachusetts Congressman John Weeks, allowed the use of federal funding to purchase forest land for conservation. The Weeks Act appropriated \$9 million to purchase 6 million acres of land in the eastern United States.

The success of the Weeks Act and its contribution to the conservation of natural resources in the eastern United States has been enormous. During the last 100 years, The Weeks Act led to the creation of 52 national forests in 26 Eastern states and the addition of 19.7 million acres on national forests and grasslands across 41 states and Puerto Rico.

In addition to the 780,000-acre White Mountain National Forest, such forests as the Green Mountain, Pisgah, Allegheny, George Washington, Ottawa and many others were created, often incorporating cut-over and eroded lands. Today they are valuable forests, providing clean water, wildlife, recreation, forest products and a variety of other goods and services.

# THE GREYDON TOLSON AWARD

In 2007 the Montgomery County Forestry Board established The Greydon Tolson Forest Resource Conservationist Award. This award is designed to recognize individuals or organizations that have made a significant commitment to advancing the science, education, technology, and/or practice of forestry in Montgomery County, Maryland.

The Board was proud to present the first Award in April 2007 to Greydon Tolson himself who passed away shortly after receiving this award. Greydon was beloved for his twenty-eight years of service as Montgomery County's first chief of tree services. He served the State Forestry Board Association and helped develop the annual summer camp for high-schoolers to introduce them to careers in natural resource management.

In April 2008, the Greydon Tolson Award was presented to Dr. Joseph A. Rice, Jr., county Christmas tree farmer and leader of both the Montgomery County Forestry Board and the State Association of Forestry Boards.

The 2009 Greydon Tolson Award was presented to Mr. Joe Howard, founder of the Montgomery County Public Schools' Outdoor Education Program, builder of the Lathrop E. Smith Environmental Education Center, and founder of Montgomery County's Champion Tree Contest, which culminates in the publication of this Register every two years.

At the 2010 Arbor Day Celebration at Locust Grove Nature Center, the Greydon Tolson Award was presented to Mr. Walter Money, renowned arborist and founder of Guardian Tree Experts.

## 2010

Walter Money began his career in the tree business with Bartlett Tree Experts. He began as a tree climber, and was often heard to say that one of the great things about the tree business is, "You start at the top and then work your way down."

In 1961 Walt and a friend started their own tree business which they called Guardian Tree Experts. The venture prospered, and by 1971 they had an office in Rockville, Maryland, and one in Annandale, Virginia. Walt bought out his partner and became president of the company.

Around the same time, Walt became very active in the National Arborists Association (now the Tree Care Industry Association), his involvement continuing to this day. He has served as President, Director, Committee

Chair and has attended every annual meeting but one since 1972.

In the '70's, Walt was involved in planting the National Christmas Tree on the mall which was donated by the NAA and was featured on local newscasts when it was blown down in February, 2011.

In 1975 Walt and his workers were called in to consult on the condition of the 4½ century old Great Holly on the campus of St. Mary's College (at that time the state champion holly). Then, in 1978 Guardian Tree Experts donated their services to care for the late, great Wye Oak.

For many years, Walt worked with Dr. Dale Dodds of California, the founder of the Maugey Tree Injection System, and Alex Shigo to research tree diseases and decay. He conducted Maugey Tree Injection Seminars in the U. S., Japan and Europe, and assisted in making the slides that were used at the seminars. In 1990 Walt received the Award of Merit from the National Arborists Association.

From a humble beginning, Guardian had grown to become the largest local tree service company in the Washington area. On October 16, 1993, Guardian Tree Experts volunteered their crews and services to help care for the trees at Arlington National Cemetery.

In March of 1999, Walt was invited to attend what was billed as "A Weekend with the Legends of Arboriculture" in Champaign, Illinois and was honored for his accomplishments during a lifetime devoted to arboriculture. Walt had the good sense to

hire Greydon Tolson who worked with Walt for 11 years after Greydon retired after 28 years as chief of Montgomery County's Tree Division. (Walt and Greydon were great friends -- Walt's daughter Rebecca named her second child Greydon after Greydon Tolson.)

On January 31, 2000, Walt retired and sold his business to Bartlett Tree Experts Co., but he continues to work with young arborists all over the United States and is always ready and willing to point out what can be done on one's property to keep the trees healthy and strong. He continues to attend all the Tree Care Industry Association meetings.

Congratulations and our community's thanks to Walt Money, winner of the 2010 Greydon Tolson Forest Resource Conservationist Award.

(l-r) Forestry Board presenter Linda Pepe, Tolson Award Winner Walter Money, his wife Mary Lou Money, Forestry Board nominator Joe Howard and his wife Mary Howard in front of the red maple planted in honor of Walt Money at the Locust Grove Nature Center in Bethesda.

The Greydon Tolson  
Forest Resource Conservationist Award  
The Montgomery County Forestry Board  
Proudly presents this award  
With deepest respect and sincere appreciation to

### WALTER MONEY

In recognition of your lifelong stewardship  
of the tree and forest resources in  
Montgomery County,

your founding of Guardian Tree Experts,  
which grew to be the largest tree care company  
in the Metropolitan area,

and your nationally recognized leadership within  
the Tree Care Industry Association  
(formerly the National Arborists Association).

April 24, 2010

# BIG TREES

The Montgomery County Forestry Board is proud to present the 2011 Register of Champion Trees, Montgomery County, Maryland. The State of Maryland's "Noted Tree List" was begun by our first state forester, Fred Besley, in 1925—the first such list in the country. Joe Howard and the Montgomery County Forestry Board began Montgomery County's champion tree list in 1989 with 42 champion species, and this year we list the largest identified trees of 165 species. Today there are over 600 different champion species on the national list administered by American Forests, and Montgomery County boasts five of those champions: the national champion cockspur hawthorn, the pawpaw, the blackhaw viburnum, the Kentucky coffeetree and the pondcypress (pictured on the cover of this 2011 Register).

For 2011, the champion tree database has been completely reviewed and updated to bring our champion tree list into full compliance with standards set by American Forests and adhered to by the Maryland Big Tree Program. Since American Forests does not formally recognize trees which are not native or naturalized in the United States, several previously listed state champion trees in Montgomery County are no longer officially state champions. Instead, these impressive trees which are not native or naturalized have been designated as "Notable and Significant" trees so that we can continue to carry them in our database, so they can continue to be recognized and enjoyed by our citizens, and so we can continue to honor their owners and nominators.

## How Can You Help Keep Our County Forests And Trees Healthy?

The Maryland-National Capital Park and Planning Commission (M-NCPPC) has placed 34,000 acres in Montgomery County under Park protection, but the future health of our forests is not guaranteed. Numerous factors including urbanization, forest fragmentation, deer overpopulation, non-native invasive plant and insect pests, air-pollution, acid rain, and encroachment will continue to stress and pose serious threats to our forests.

With our current economic challenges, most every tree- and forest-related budget in our County has been significantly cut. Consequently, the proper maintenance of our public forests and trees is in jeopardy. We all owe a debt of gratitude to two committed and visionary career M-NCPPC employees (and their staffs) who have created volunteer opportunities for YOU to help maintain our forests and trees. Great thanks to M-NCPPC Forest Ecologist Carole Bergmann and to Holly Thomas of the MNCPPC Urban Forestry/Arboriculture Section.

*Look for details of their volunteer programs throughout this year's Register of Champion Trees.*

## Weed Warriors Volunteer Program

One of the greatest threats to the health and longevity of champion trees is the potential for harm caused by non-native invasive plants (NNIs), especially those that are woody vines. Experts consider non-native invasive plants, animals, insects and pathogens to be the second greatest threat to biodiversity after outright habitat destruction. These species were introduced on purpose or accidentally into ecosystems where they did not evolve, and without the natural controls present in their native environments they can spread unchecked.

In 1999, Forestry Board member Carole Bergmann – Forest Ecologist for M-NCPPC and Montgomery Parks – created Weed Warriors, a model and often duplicated program that trains citizens to recognize and remove invasive plants. Even working an hour a week, a Weed Warrior can “cut windows” in a significant number of strangling and suffocating vines, reducing seed source and relieving trees of unsupportable weight as the upper portions of vines lose moisture and die.

Carole and her staff at Montgomery Parks have trained

more than 750 Weed Warriors since program inception and these volunteers have devoted more than 30,000 hours to invasive removal—the equivalent of 15 staff years’ worth of full-time park employee labor. And at this time, when tight budgets are stretching the resources of public agencies to the limit, volunteers like Weed Warriors are more important than ever for the health of champion trees and those that might grow up to be champions.

## Forest Steward Volunteer Program

MNCPPC Parks has initiated a new volunteer opportunity for county citizens.

As a natural extension to the Weed Warriors Program, Carole Bergmann is launching a Forest Steward Volunteer Program as well. The mission of the Forest Stewardship Volunteer Program is to enable the trained citizen volunteer to help improve the current condition of our forests and enhance the future ecological and social benefits of our Park forests. Any volunteer who has received the Weed Warriors training will be eligible to become a Forest Steward.

Forest Steward volunteers will have the opportunity to be responsible for establishing baseline data, monitoring conditions and coordinating maintenance efforts in entire target sites. These sites will include reforestation/restoration plots, non-native invasive removal/restoration sites, and deer-exclosure plots that have been erected around areas of rare/threatened/endangered species, around areas of high quality natural habitat, and around communities of naturally regenerating woods.

For more information or to apply to become a Forest Steward, contact Carole Bergmann at *Carole.Bergmann@montgomeryparks.org* or 301-962-1348.

## Historic, Significant and Champion ("HSC") Tree Steward Program

M-NCPPC, Urban Forestry/Arboriculture Section maintains and cares for Historic, Significant, and Champion trees (HSC) in Montgomery Parks. Our Arborists' goals are to advocate support and provide care for trees deemed to be historic, significant or champion. This program has made it possible for volunteers to support our specially trained staff employees to care for some of the Park's most interesting trees. HSC Tree Stewards can use their talents, skills and interests to help M-NCPPC Arborists and staff promote the longevity and invaluable benefits of trees for future generations of Montgomery County Park visitors and the world.

Volunteer opportunities include but are not limited to the following: maintaining mulch beds around trees, weed removal, pruning, routine health inspections, mapping of tree locations, measuring trees, inventorying of trees, historical research, data entry and public outreach and education.

The minimum age for a HSC Tree Steward is 18 although group projects are available for younger individuals accompanied by an adult supervisor.

For more information or to apply to become a tree steward, please email or call Jeanne Kavinski, M-NCPPC Urban Forester at [jeanne.kavinski@montgomeryparks.org](mailto:jeanne.kavinski@montgomeryparks.org) or 301-650-2634

## Urban Tree Steward Program

A key role of the M-NCPPC, Urban Forestry/Arboriculture Section is the stewardship of trees in 410 Montgomery Parks through inspection and maintenance programs. Urban Foresters conduct inspections of Park trees surrounding intensively used areas such as playgrounds, ballfields, paved trails, parking lots, gardens and facilities. Inspection of Parks is a priority for providing a safe and enjoyable park experience. Tree Care is performed by Professional Arborists and specialized maintenance crews trained to maintain and promote tree health while protecting public safety.

Urban Tree Stewards can use their talents, skills and interests to aid Montgomery County Park's staff in maintaining public safety as well as improving the aesthetic appeal of Montgomery County Park trees. By observing and reporting existing tree conditions in our Urban and Suburban parks, volunteers will play a valuable role in protecting park visitors from the dangers and risks associated with dead, dying and diseased branches near paths, side-walks, structures and play equipment.

Volunteers interested in this program will be trained in basic tree identification and risk assessment by staff Certified Arborists. If under 18, a volunteer must be accompanied by an adult family member.

For more information or to apply to become a tree steward, please email or call Jeanne Kavinski, M-NCPPC Urban Forester at [jeanne.kavinski@montgomeryparks.org](mailto:jeanne.kavinski@montgomeryparks.org) or 301-650-2634

## The Montgomery County Forestry Board . . .

Maryland's Forestry Boards were established in 1943 to assist the State's Forest Park and Wildlife Service with the promotion of rural forest management on privately owned woodlands, and their original goal was to help assure a supply of wood fiber products through scientific forest management. Today, the role of the Forestry Boards has been expanded to help restore the Chesapeake Bay, to improve the environment in urban and suburban areas, and to educate the general public about the wide range of forest benefits.

The Montgomery County Forestry Board has evolved into a dynamic working group whose members represent virtually every aspect of forest and tree planting, maintenance, management and education in our county. The Board's meetings are a unique gathering place for licensed foresters, certified arborists, outdoor educators, forest management specialists and concerned citizens. Members are private citizen landowners and representatives of county streets, parks, schools and planning agencies, public utility companies, private nurseries, tree care companies and tree farms. Members share information and ideas for solving problems and promoting the health and growth of county forestland, both rural and urban.

More information about the Montgomery County Forestry Board can be found at [www.mcndforestryboard.org](http://www.mcndforestryboard.org). Thanks go to Board member Jim Harris for maintaining this web site.

The Montgomery County Board is pleased to have coordinated, prepared and supplied materials for student-involved reforestation tree plantings at Sandy Springs Friends School in 2009 and at The Barnesville School, Earle B. Wood Middle School, and Cedar Grove Elementary School in 2010. We are proud to say that every individual Board member participated in one or more of these school reforestation plantings. Thanks to all.

The Board is also pleased to have supported the participation of seven Montgomery County high school students in the annual "Natural Resource Careers Conference" in the summers of 2009 and 2010. We extend our gratitude to Board members Dan Landry, Jim Harris and Laurie Jenkins who interviewed the student applicants and to Pepco whose generous support enabled these students to attend tuition-free.

This 2011 Champion Tree Register marks the 22nd anniversary of Montgomery County's Big Tree Contest, and the 16th Anniversary of the publication of the Register of Champion Trees. Very special thanks go to Big Tree Contest founder Joe Howard, whose dedicated service helped him earn the 2009 Greydon Tolson Award. Thanks also to his "right hands" Joli McCathran, Laura Miller and Linda Pepe. We thank Donna Will and Dori Murphy for their beautiful photographs and Laurie Jenkins and Vicky Frank at the Lathrop E. Smith Environmental Education Center, along with David Plummer, Montgomery Soil Conservation District Manager, for their administrative support." MCFB is especially grateful to Peggy Carr at Sir Speedy Printing in Rockville. Peggy combines her commitment to our mission with her artistic and technical talents to bring all elements of this Register to fruition.

Forestry Board members admire the gnarled trunk of the champion Kobus Magnolia, *Magnolia kobus*, in Kensington during their annual tour of Montgomery County champion trees. See a photo of this tree in bloom on page 9.

## The Montgomery County Forestry Board Members:

**Daniel Landry, Chair**, *Pepco*

**Dominic Quattrocchi**, *Maryland-National Capital Park & Planning Commission (MNCPPC)*

**Pete Stadler**, *Emeritus Member*, *Stadler Nursery*

## Thanks

**Our deepest thanks to donors for their financial support of Forestry Board programs and activities:**

- Pepco for sponsorship of the Natural Resources Career Conference and school reforestation trees
- Maryland-National Capital Park and Planning Commission, Parks Department for their support of the publication of this Register
- Dolce International/Bolger Center, Potomac, Maryland for supporting reforestation at local schools

# You Can Nominate a Champion Tree

The Montgomery County Forestry Board solicits and compiles nominations for champion trees from April through November in even numbered years. A professional forester measures the nominated trees, and new championship certificates are awarded in April of odd numbered years as part of the County's annual Arbor Day Celebration at the Agricultural History Farm Park. You can nominate a champion tree at any time.

If you think you have discovered a tree larger than the ones noted or a tree species for which there is no champion, the Forestry Board welcomes your nomination. The nominated tree must have a single trunk for at least four and one-half feet above ground level and a total height of at least fifteen feet.

To learn how to measure a tree, visit [www.dnr.state.md.us/forests/kids/bigtrees.html](http://www.dnr.state.md.us/forests/kids/bigtrees.html).

Photocopy this page or call 301.854.6060 to request a nomination form.

## How is A Tree Measured?

Fred Besley devised the measuring system for Maryland in 1925 that would become standard for the national competition started by the American Forestry Association in 1940. In fact Fred Besley provided the first official measurement of the recently departed Wye Oak.

To evaluate the relative size of a tree, the circumference of the trunk in inches (at 4.5 feet above the ground) and the height and crown spread in feet are added together to arrive at a number of points for each tree. This number is then used for comparison of tree sizes in each species. The formula is:

$$\text{Circumference (inches)} + \text{height of tree (feet)} + 25\% \text{ of the average crown spread (feet)} = \text{Total Points.}$$
