

Bill Rate Changes for Montgomery County Solid Waste Charge

A new bill rate for the Base and Incremental Systems Benefit Charges will take effect for all property owners on **July 1, 2025**, to ensure continued quality of services.

Systems Benefit Charges are part of your county Solid Waste Charges, which appear on your annual property tax bill. Charges are different for residential and nonresidential properties with additional charges for curbside collection services, Leaf Vacuuming Districts and Municipalities. These charges are annually reviewed and set to cover necessary costs for solid waste programs and facilities.

The increase in Systems Benefits Charges will fund the continued delivery of solid waste services. This includes covering the cost of:

- **Operations of solid waste disposal programs and facilities**
- **Maintenance and operations of collection infrastructure**
- **Waste reduction programs**
- **Public education and outreach on waste and recycling**
- **Debt service on capital projects**
- **Recycling reporting and compliance**
- **Program administration and staffing**

The County recognizes that the bill rate reflects a significant increase from the prior year. The increase reflects the need to replace and repair critical equipment at the [Resource Recovery Facility](#) and Transfer Station. These facilities protect public safety, public health, and the environment by providing a reliable solid waste management system.
