Should such damage or destruction of the Leased Premises or any substantial part of the Leased Premises render the Leased Premises wholly unavailable for use by the County's Licensee for use as a Child Care Center, the Board shall promptly begin and diligently pursue the repairing, restoration and rebuilding of the Leased Premises as nearly as possible to the condition they were in immediately prior to such damage or destruction or with such changes or alterations as the Board may determine appropriate. 21. ASSIGNMENT AND LICENSING: The County shall not assign this Lease or license the Leased Premises without the prior written consent of Board, provided that such consent will not

be unreasonably withheld, conditioned or delayed. The above notwithstanding, the Board hereby approves the use of the Leased Premises by a licensed child care provider to be selected by the County for the sole purpose of operating a child care program. However, the County shall provide a copy of the proposed license agreement to the MCPS Director of Department of Facilities Management for approval prior to presentation to the Licensee and the failure of the Board to not approve the document within thirty (30) days of the receipt of the same will be deemed to be an approval by the Board of the proposed license agreement.

22. SURRENDER OF POSSESSION: The County covenants, at the expiration or other termination of this Lease, to remove all of the County's personal property from the Leased Premises, and to return the Leased Premises in broom clean and in good repair, order and condition in all respects, reasonable wear and tear excepted.

F. REVIEW AND REPORTING

This policy will be reviewed on an on-going basis in accordance with the Board of Education's policy review process.

Policy History: Adopted by Resolution No. 654-73, November 13, 1973; amended by Resolution No. 285-97, May 13, 1997.

Electricity

1. **Temperature Set Point:** The maximum cooling level is 76° F. Set thermostats accordingly. Some temperature variation will occur as equipment cycles on and off. Report cooling problems only if room temperature measured with a thermometer stays three degrees or more above or below set point.
2. **Controls:** Do not attempt to tamper with energy management or HVAC controls on equipment. Any problems with controls or equipment should be dealt with promptly through the work order system. Provide frequent inspection of pneumatic controls, including system filter/dryer, automatic bleed, and compressor run time. Test and calibrate all pneumatic thermostats at the start of each cooling season.
3. **Computers:** Shutting down computers not in use is important. Computers in our schools consume more energy than the lighting. **Teachers and students should shut down the computer at the end of each use, unless a new user is waiting.** Sweeps should be made to shut down all computers immediately after school hours and before weekends, holidays, and breaks. Use of **flat panel monitors** is encouraged whenever procuring new displays. Flat panel monitors use 70 percent less energy than CRT models and help reduce excessive heat build-up in computer labs and closets.
4. **Lights:** Teachers should ensure lights are turned off when leaving the classrooms unoccupied, even for a few minutes. Every effort should be made to avoid accidentally leaving lights on in storerooms, crawl spaces, attics, and other unoccupied spaces. Corridor lighting should be reduced in over-illuminated areas and turned off during unoccupied periods. Gym, auditorium, and stadium lights should be controlled on a tight schedule. Gym lights should be turned off during class periods when the gym is not in use.
5. **Light Levels:** Light levels may be reduced to the acceptable levels for different activities as listed on the attached chart: **Recommended Footcandle Levels.** Your SERT Energy Facilitator will provide you with instruments and instructions to successfully reduce light levels and save energy.
6. **Task Lighting:** Use a desk lamp (with compact fluorescent bulb) instead of overhead lighting as much as possible, especially at teaching stations when students are out. Computer labs should use compact fluorescent uprights (torchiere lamps) to improve visibility of computer screens, and save energy by turning out overhead lights.
7. **Lighting Maintenance:** Maintain automatic lighting controls, occupancy sensors, or daylight sensors where installed. Light fixtures and lenses should be cleaned annually and the date documented.
8. **Daylighting:** Whenever possible, teachers should utilize natural light instead

of artificial light. Window shades should be adjusted to make best use of daylighting. Most classroom lights are controlled by two or more switches, so artificial lighting can be reduced when daylight is available.

9. **Exterior Lighting:** All outside lighting should be **off** during daylight hours. Building security lighting should be on from dusk to dawn daily. Parking lot lights should be turned off at the close of the regular school day or evening activities (by 12:00 midnight at the latest) and back on at 6:00 a.m., to dawn (unless sunrise is before 6:00 a.m.) Building service managers should notify the maintenance depot of any irregularities in exterior lighting control.
10. **Cleaning Crews:** All lights are to be turned **off** when students and teachers leave school. Building service workers are to turn on lights only in the areas in which they are currently working.
11. **Holidays and Breaks:** All electrical equipment should be shut down or unplugged per checklists before long weekends and school breaks.
12. **Off-Peak Use:** When possible, electricity use (for kilns, laminators, etc.) should be scheduled prior to 12:00 noon when lower, off-peak rates are in effect.
13. **Infiltration Control:** All windows and outside doors are to be kept closed when cooling systems are in operation. Corridor doors and doors to classrooms should remain closed when HVAC is provided. Doors to gyms and pools are to be kept closed. Report faulty door closers to the maintenance depot.
14. **Vending Machines:** Vending machines are major electric users that often cost more to operate than the school receives in revenues. A typical soft drink machine costs over \$500 per year to operate. Measures should be taken to minimize the number of vending machines and the hours of use.
 - a. Review your school's vending machine use and have little-used units removed.
 - b. Vending machines must be removed from the main entrance or lobby of all schools effective with the 2004-2005 school year.
 - c. Unplug vending machine units when "Sold Out" is displayed.
 - d. Operation of vending machines must be automatically controlled per the following specifications.

Heating

1. **Temperature Setpoint:** The maximum heating level is 70° F. Set thermostats accordingly and recheck monthly. Some temperature variation will occur as equipment cycles on and off. Report heating problems only if room temperature measured with a thermometer stays 3° or more below set point.
2. **Controls:** Building staff or occupants should not attempt to manually control equipment by tampering with energy management or HVAC controls of equipment. Any problems with controls or equipment should be dealt with promptly through the work order system. Provide frequent inspection of pneumatic controls, including system filter/dryer, automatic bleed and compressor run time. Test and calibrate all pneumatic thermostats at the start of each heating season.
3. **Hours:** During non-school hours, heat is furnished only for MCPS activities and user groups with reservations through the ICB/CUPF. Consolidate necessary MCPS evening activities into the minimum number of zones possible. HVAC will not be provided for an individual to use a classroom or office outside of normal hours. HVAC systems will remain off during cleaning, except when ventilation is required for waxing or stripping activities.
4. **Filters:** Replace filters of all equipment at recommended intervals. Maintain documentation per your building maintenance plan.
5. **Boiler Maintenance:** Fuel oil burners should be cleaned and tuned for optimum combustion twice yearly.
6. **Pumps:** Only one main heating pump should be operated, except where additional pumps are provided for separate zones. Do not operate main pump and standby pump at the same time.
7. **Unit Ventilators:** Maintain unit ventilators free of obstruction, such as books, plants, and furnishings, both on the top grill and at the bottom intake, so that air can circulate efficiently throughout the room.
8. **Infiltration Control:** All windows and outside doors are to be kept closed when heating systems are in operation. Corridor doors and doors to classrooms should remain closed when HVAC is provided. Doors to gyms and pools are to be kept closed. Report faulty door closers to the maintenance depot.
9. **Storage Spaces:** Close unused storage rooms and set thermostat controls, where installed, to the lowest possible temperature setting that will prevent freezing.
10. **Personal Electric Space Heaters:** Personal space heaters will not be permitted. Such units, in addition to having high energy costs, are a fire and safety hazard. Only heaters installed by the Division of Maintenance for emergency use will be permitted; others will be confiscated.

MCPS RESOURCE CONSERVATION GUIDELINES

Food Preparation

Cooking Equipment

1. Preheat only equipment to be used 15 minutes before using.
2. Reduce temperature or turn equipment off during slack periods.
3. Cook full loads on every cooking cycle when possible.
4. Use the correct size equipment for all operations.
5. Avoid slow loading and unloading of ovens and opening doors unnecessarily.
6. Keep equipment clean for efficient operation.

Hot Food Holding and Transporting

1. Preheat equipment before loading.
2. Always use at full capacity when possible.
3. Clean thoroughly daily.

Refrigeration Equipment

1. Keep doors tightly closed and avoid frequent or prolonged opening.
2. Place food in refrigerator or freezer immediately upon arrival from supplier.
3. Keep evaporator coils free of excessive frost.
4. Keep condenser coils free of dust, lint, or obstructions.
5. Unplug equipment that is not needed.

Ware Washing Equipment

1. Always operate equipment at full capacity when possible.
2. Flush after heavy meal periods—clean thoroughly, daily.

Water Heating

1. Repair leaking faucets as soon as possible.
2. Reduce storage temperature to 120° F where possible.
3. Insulate hot water pipes.

Ventilating System

1. Use only the number of fans necessary at all times to provide adequate ventilation.
2. Turn fans off upon completion of cooking.
3. Operate two-speed fans on the lower speed when possible.
4. Keep filters and extractors clean.

MCPS RESOURCE CONSERVATION GUIDELINES

WATER USE

GENERAL

1. **Be alert for water leaks** and water main breaks. Look for continuous water flow through the water meter at any time, ponding of water around the building, and report leaks to maintenance immediately. A broken water main can release tens of thousands of dollars in water a week until it is repaired.
2. **Report and repair leaking faucets** and faulty flush valves promptly. Check and adjust valves for proper timing annually.
3. **Water is an MCPS resource and not to be given away** or used by outsiders. Users scheduled through ICB are allowed to use water related to their activities. Do not provide free water to road maintenance tankers or any other non-MCPS agency.
4. Do not allow local residents to use school hose bibbs or to control irrigation.
5. **Car washes may not** use school water supplies. Off-site arrangements may be made with a local gas station to hold a car wash for fund raising.
6. The utility budget pays for bottled water only in elementary school portable classrooms.

IRRIGATION

These general guidelines are supplied for the education of individuals operating turf irrigation equipment to help with the successful management of healthy turf.

1. **Avoid Excess Watering.** Excessive watering promotes fungal growth and prevents the development of long, deep root systems needed for healthy turf.
 - a. **Use a simple rain gauge.** Turf in our climate needs only 1" of water per week for optimum health. Use weather reports or your school's rain gauge to determine whether irrigation is needed each week.
 - b. **With timer systems, check zones for proper saturation levels.** Make sure water saturates the root zone when irrigating but no further. No runoff should occur from the area being watered.
 - c. **Make sure irrigation systems are turned off when it rains.** The installation of rain switches on automated irrigation systems is highly recommended.
2. **Irrigate only in early morning or late evening hours.** This timing minimizes evaporation to the air.
3. **Irrigate only two or three times a week.** This interval promotes deeper root growth, which establishes healthier and sturdier turf.

- (5) If the pesticide is not addressed in the notice sent at the beginning of the school year, a brief description of the pesticide to be applied

EXHIBIT "C"

ECF-RB

- (6) A brief description of potential adverse effects based upon the material safety data sheet of the pesticides to be applied
 - (7) The name and telephone number of the Integrated Pest Management Supervisor who is the designated contact person
4. For application on school grounds, the notice of planned date and time of application may specify that weather conditions or other extenuating circumstances may cause the actual date of application to be postponed to a later date or dates.
 5. If the actual date of application is more than 14 days later than the planned date provided in the notice, notice of the application required under this regulation shall be reissued.

D. Emergency Pesticide Applications

A pesticide may be applied in a school building or on school grounds without prior notification only if an emergency pest situation exists.

In the case of an emergency pesticide application in an elementary school building or school grounds, within 24 hours after pesticide application or on the next school day, the school will provide to each parent, guardian, or staff member:

1. Common name of the pesticide
2. Location of the application
3. Date and time of the application
4. The following language:

5. A brief description of potential adverse effects based upon the material safety data sheet of the pesticide applied

EXHIBIT "C"

ECF-RB

E. Use of Bait Stations

Before a bait station is used in a school, the Integrated Pest Management Supervisor and/or his staff will place a notice or sign on the door of the room in which the bait station is placed indicating the date of placement, the name of the contact person for additional information including information on potential adverse effects. The notice or sign will remain posted until the bait station is removed.
