Narrative

Tree Protection Plan for 3916 Infill Lane, Bethesda MD
ROW Permit No. 81976A

Purpose:
This Tree Protection Plan is submitted in response to the approval by the Environmental Protection Agency (EPA) of the Permit No. 81976A for the proposed project. The plan is for the protection of trees and their root zones in accordance with the Maryland Department of Transportation (MDOT) Tree Protection Regulation. The project is to remove a tree and replace it with another tree as per the approved plan. The tree to be removed is a 26-inch American sycamore, and the replacement tree is a 22-inch American sycamore.

Condition:
- 26-inch American sycamore: Good condition
- 22-inch American sycamore: Good condition

Retain and Protect

Remove Stump - see DPS Stump Removal Specifications

Aplicant will pay $500.00 non-refundable fee to DPS for removing one roadside tree prior to issuance of RGW Use Permit

Scale: 1” = 20’
