Adventist Rehabilitation Hospital of Maryland – Driver Rehabilitation Program
Provide a clinical evaluation which includes an assessment of vision, visual perception, cognition, reaction time, and motor skills related to driving. Also provide a behind-the-wheel evaluation, which is done in a vehicle equipped with an instructor brake so the therapist can gain control of the car if needed. Vehicle is equipped with adaptive controls (i.e. brake, accelerator, etc.). Training is provided if it is determined the client needs special equipment or adaptive strategies. A prescription for a driving rehabilitation evaluation is needed from a doctor. This program is unable to accommodate new drivers or those who will need to drive from a wheelchair. Clients must be able to transfer in and out of a car and tolerate sitting in a car. Medicare and secondary insurances do not pay for driving rehabilitation evaluations, training or equipment needed for the client’s vehicle. If applicable, Worker’s Compensation or the Maryland Division of Rehabilitation Services may pay for evaluations. Services are provided by Brant’s Driving School.

Division of Rehabilitation Services (DORS) – Workforce & Technology Center
Drivers Assessment and Adapted Driving
Certified driving instructors evaluated individuals with disabilities to determine their ability to drive motor vehicles. Staff also determine what adaptive equipment individuals with disabilities will need to get a driver’s license and then provide training on how to use the adaptive equipment. DORS Counselors will discuss whether a special license is required, the time needed to obtain a license, the role of the MVA Medical Advisory Board, what help DORS can provide in preparing an individual for the Learner’s Permit and/or the driving test, where testing and/or training can take place, and what type of testing is administered.

Driver Education: Deaf and Autism Spectrum Disorder
Customized driver education for individuals who are Deaf or are diagnosed with an Autism Spectrum Disorder. This includes the MVA 30-hour Driver's Education classroom course and 6 hours of behind-the-wheel training. After students complete the course, staff can assist in transporting them to the MVA to take the learner’s permit examination.

Explore Older Driver Resources in Montgomery County – Montgomery County Government
Provides information and resources including driver skills refresher courses, driver evaluations, safe driving strategies and screening tools, driver mobility programs, and other transportation options.
www.montgomerycountymd.gov/senior/older-driver-resources.html

F.O.F. (“Focus on Function”) Occupational Therapy Services, LLC
Provide behind the wheel evaluations, adaptive equipment training, and driver rehabilitation. A pre-driving screening/clinical evaluation is completed to assess vision, visual perception, cognition and physical functioning. A behind the wheel evaluation is completed to assess driving safety and fitness. The client is evaluated on his/her ability to physically control the vehicle as well as cognitive, visual and perceptual abilities. Driver training is available to those who require the use of adaptive equipment to operate a motor vehicle. Available adaptive equipment includes left foot accelerator, hand controls, spinner knob and cross-over turn signal. Driving evaluation and/or training results are forwarded to the referral source or to the MVA’s Medical Advisory Board. Clients may be referred by physicians, insurance companies, rehabilitation and other medical professionals, individuals and their families.

MedStar Good Samaritan Hospital – Driver Training Program
For individuals with disabling injuries or illnesses or who want to return to driving or learn to drive for the first time. Program is also open to older drivers and people who may not drive but require transfer and safety training. Program offers services ranging from pre-driving evaluations and education to assistance with purchasing adaptive equipment and vehicles. Services include: pre-driving evaluation to assess day and night vision, strength and coordination of the driver’s arms and legs, ability to think and react quickly on the road and basic knowledge of the most up-to-date driving rules and laws; on-the-road evaluation held in your car or fully-equipped, wheelchair-accessible van to assess the driver’s ability to get in and out of the vehicle and to drive safely in different types of traffic; training with the most up-to-date adaptive equipment to improve driving skills; complete preparation for the state road test; provision of a vehicle or special equipment for use in taking the state road test; advice on how to adapt a vehicle to include special equipment such as hand controls, ramps, lifts or special steering wheels; advice on finding a place to buy special driving equipment and getting it installed correctly; advice on financial assistance to adapt cars and vans to meet the driver’s needs; assistance with filling out forms to apply for a driver’s license or changing a license to one that permits special equipment; and consultation with family members about the driver’s abilities. Eligibility: stable health; a current driver’s license or be eligible for a learner’s permit; a desire to return to or begin safe driving; and a doctor’s order that specifies “OT/PT rehab engineering driver evaluation and training”. Serve Maryland and the D.C. area.

Montgomery College Driver Education Special Needs Classes
Course prepares rookie drivers with moderate learning disabilities for the Maryland driver’s license test. Course consists of the required 30 hours of classroom instruction and 6 hours of Behind-the-Wheel training (individual in-car lessons). Classroom includes differentiated instruction, supplemental aides and services, a multi-sensory approach to learning, and support for students with moderate learning disabilities. Behind-the-Wheel is one-on-one instruction with a dually certified MVA and MSDE Special Driver Education. Typical class size is 12 students. Learner’s permit required. Standard Driver Education Course is inclusive accommodating students with mild learning disabilities. Registered students with disabilities, IEPs or 504 plans should contact Disability Support Services at 240-567-4118 (V) or e-mail Natalie Martinez, Disability Support Services Counselor, at natalie.martinez@montgomerycollege.edu. Accommodations for support services must be made at least 3 weeks before course start date. Scholarships: There are several scholarship opportunities for learning disabled Driver Education students to take Driver Readiness Assessment, Learner Permit Preparation Course, Driver Education for Learning Disabled, and 10-hours of Driver Improvement Lessons.

Rehabilitation of Frederick, Inc. – Driver Evaluation and Drivers Education
Adaptive Driver Evaluation: Services include a clinical and behind-the-wheel evaluation in adaptive vehicles to evaluate an individual’s potential to drive. Driving evaluation assesses the individual’s vision, visual perception state, physical disability, and cognitive functioning for the task of driving. Offer three different adaptive vehicles for evaluation. Services can be provided at consumer’s location with appropriate travel reimbursement.

Drivers Education for Individuals with Disabilities: Maryland MVA Certified Drivers Education program. Licensed and certified to teach the Maryland standardized curriculum for novice drivers with special requirements. Provide adaptive behind-the-wheel drivers education for all disabilities including adaptive car, adaptive van, and adaptive truck needs. A restricted Learners Permit is required to provide services as part of the graduated license system requirement for the state of Maryland. Serve Maryland, Virginia and West Virginia.

Sinai Hospital - Driver Evaluation and Training Program
Assessment consists of a pre-driving clinic evaluation and a behind-the-wheel evaluation. The clinic evaluation includes assessment of vision, reaction time, cognition, memory, physical function and possible need for adaptive equipment. The behind-the-wheel evaluation and training is completed in a Sinai Hospital–owned and –insured vehicle. Adaptive equipment may be added to this vehicle and used if needed. The driving route is designed to assess the driver’s skills under normal driving conditions. If needed, training will be provided on the use of adaptive equipment. Results of the evaluation will be discussed with you. Recommendations will be made regarding driving safety, the need for further training or the application of new driving techniques. A written copy of the evaluation will be forwarded to you, your primary care physician and, if applicable, to the Motor Vehicle Administration. Medicare and most health insurance plans do not cover the cost of evaluation or training. These evaluations are charged by the hour and most evaluations are completed in two to three hours. Driver training is usually one to two hours in duration.

**Saint Agnes Hospital Driver Rehabilitation**

Driving evaluations for people with disabilities or age related issues. A pre-driving clinical assessment is conducted to determine if an individual has the skills needed to be a safe driver. An On-Road Evaluation is recommended following successful completion of the pre-driving screening and is conducted by a Certified Driver Rehabilitation Specialist. Assessment is conducted in a vehicle equipped with a variety of adaptive controls to accommodate drivers with a variety of disabling conditions. A driving education component is included in all aspects of the driver rehab program including counseling, support, instruction in the use of a variety of adaptive equipment and community resources if return to safe driving may not be possible. A physician’s prescription is required in order to participate in the program. Valid driver’s license or eligibility for a license with restrictions is required. Referral may be initiated by the driver, family member, MVA or other agency. Service is not typically covered by Medicare or other insurance agencies.

**Staying on the Go! – Jewish Social Service Agency (JSSA)**

Mobility Program offered by JSSA. A trained social worker works one-on-one, or with family members, on issues related to transitioning away from driving. The goal of the program is to reduce feelings of stress and anxiety about changes in driving, and to develop an action plan for continued mobility.

**University of Maryland St. Joseph Medical Center – Safe Driver Assessment Program**

In-house clinical assessment program. Program targets individuals who are coping with the side effects of aging, amputations, arthritis, diabetes, dementia, low vision, multiple sclerosis, parkinsonism, stroke, brain injury, or memory loss. Program consists of standardized tests which provide a comprehensive analysis of an individual’s cognitive, perceptual, emotional, and physical capabilities. Feedback is given concerning an individual’s readiness for driving and a recommendation for further on-the-road evaluation and training if necessary. A physician order is required for “OT Driver Evaluation”. An individual, family member or a physician may request this service. Cost is $180 per assessment and is not covered by medical insurance. Results of the clinical Safe Driver Assessment are written in a concise summary report outlining the individual’s driving capacities and impairments. A recommendation for further-on-the-road evaluation can be arranged with a local program. Information is provided to the referring physician.

**VA Maryland Health Care System – Driver Rehabilitation Program**

Driver rehabilitation program helps veterans with a variety of disabilities and age-related health conditions learn to drive again. Additionally, veterans with prosthetic arms or legs and those who suffered brain injuries or stroke can also regain their independence through this program. The program coordinator evaluates individual limitations and needs with the use of adaptive driving equipment, driver simulator training, and a series of driving evaluations on the simulator and behind the wheel of a car. A veteran’s vehicle can also be fitted with a variety of adaptive equipment from strategically placed mirrors, to digital steering devices for amputees. Services offered at the Washington DC VA Medical Center.
