## TREATMENT FOSTER CARE PROGRAM

The Treatment Foster Care program is intended to provide services to children who have serious emotionally handicapping conditions, significant medical needs and developmental disabling conditions. The primary goal of the program is to provide an alternative to placing children in institutional or hospital settings. The program provides children with specialized treatment in a home environment where they can benefit from community based services and the nurturance of a family. Treatment Foster Care also provides a step-down structured environment for children transitioning from residential care back into the community.

## ELIGIBILITY CRITERIA
