THE VIRGINIA GRAEME BAKER ACT (VGB) APPLICATION: This form must be completed and submitted for any drain cover that was replaced due to normal wear or required drain cover replacement because of the May 26, 2011 U.S. Consumer Product Safety (CPSC) drain cover recall. In addition, any facility with a single unblockable drain (drain that is a minimum 18" by 23" in perimeter), the CPSC voted on September 28, 2011 to interpret an unblockable drain based on the dimensions of the sump and not the actual drain. For this reason, any pool with an unblockable drain must fill out the VGB form indicating the facility has an unblockable drain and document the size of the sump. If the sump does not meet the minimum dimensions, either the pool must come into compliance with dual main drains or provide a back-up system or device.

Skimmers with operable equalizer lines must have a float assembly valve (turtle) and check valve.

2012 VIOLATIONS: Any violation(s) noted during the last inspection of 2012 must be corrected before the **2013 Pre-Opening inspection.**

ALTERNATIVE ENTRAPMENT PREVENTION SYSTEM: Anyone using an alternative system must demonstrate, at the pre-opening inspection, that the alternative system works. The alternative system must be tested and recorded daily.

FOOD: If food is being distributed at the pool, a license must be obtained from Licensure and Regulatory Services. An inspection should be scheduled at the same time the pool is scheduled for inspection.

INJURY REPORTS: Injury reports must be submitted to Licensure and Regulatory Services whenever there is an incident. This report must be submitted when there is any injury, drowning, near drowning, suction entrapment, or waterborne illness. The report must be submitted within 24 hours if the incident results in death, illness, admission to the hospital, or requires resuscitation. Any water rescue must be reported within 3 months, or, in the case of a summer seasonal pool, by the end of the season.

MANAGEMENT COMPANY REGISTRATION: A management company may not operate a pool without being registered with Licensure & Regulatory Services. When a management company takes over the management of a pool from another management company during the year, a new registration must be issued. The registration for the new company will be issued as soon as the registration application and fee are submitted.
