What is Home Improvement?

The home improvement law defines "home improvement" as the addition to or alteration, conversion, improvement, modernization, remodeling, repair or replacement of a building or part of a building that is used or designed to be used as a residence or dwelling place or a structure adjacent to that building; or an improvement to land adjacent to the building. For more information, please visit www.dli.maryland.gov/license/mhic, call MHIC at 410-230-6309 or email dipolmhic-dli@maryland.gov.

10 Tips for Choosing a Home Improvement Contractor

1. Decide which improvements you want to make to your home
Determine the type of improvement you want to make to your home and the amount of money you can comfortably spend. Take the time to write down the details of the work you want done before you contact a home improvement contractor.

2. Seek licensed contractors
Hire only licensed contractors. By hiring a licensed contractor you may be eligible for the Guaranty Fund in case you become a victim of unworkmanlike or incomplete work.

3. Obtain more than one estimate for the improvements you want to make
Always comparison shop. Obtain estimates from more than one licensed home improvement contractor.

4. Ask prospective contractors to show you their home improvement licenses
License
Ask prospective contractors to show you their home improvement licenses. Check the license expiration date.

5. Check contractors licensing status
You can confirm that a contractor is licensed by going to the Home Improvement Commission website at: www.dllr.maryland.gov/license/mhic and click on “License Search”.

6. Check the contractor’s record
Call the Home Improvement Commission at (410) 230-6309 to check the record of the home improvement contractors. The Home Improvement Commission’s staff can tell you if the contractor is currently licensed, whether complaints have been filed against the contractor, and whether the complaints have been resolved.

7. Request references from the prospective contractor
Ask the contractor for the names and telephone numbers of customers. Check with references about the quality of the work and whether the work was completed on time.

8. Choose the contractor who is right for you
Carefully review the contractor’s estimate, home improvement record, and references. Choose the contractor who best fits your needs and who can provide the best service at the price you can afford.

9. Always get a written contract
Always get a written contract before you permit work on your home to proceed. Make sure the contract includes the approximate date the work will begin, details the type of improvements that are to be made, the materials to be used, the estimated completion date, the contract price and payment schedule. Carefully read the contract before signing. Be sure you check to see if the contract contains an arbitration clause.

10. Request to see the building permit
Certain types of home improvement work require building permits from your local government. Check with your local licensing and permit department to see if a permit is needed. If it is, make sure the contractor shows you the building permit before you allow work to begin.

BONUS TIP: Do not pay before reading or signing a contract
Maryland law prohibits a contractor from demanding and receiving payment before a contract is signed.

The Maryland Improvement Commission (MHIC)
The Commission (MHIC) has been serving Maryland consumers since 1962. We believe that a successful home improvement project adds to the value of your home and your well-being. Please read the information contained in this brochure carefully before signing any contract. MHIC administers the Home Improvement Guaranty Fund to compensate consumers for monetary losses which arise from poor or incomplete unworkmanship by licensed contractors. If you have questions, or need more information, call MHIC at (410) 230-6309, email dllp@mhic.dllr@maryland.gov, or go to the website at dllr.maryland.gov/license/mhic
