Other services include staffing support for immunization clinics, STD services, pregnancy testing in regional health centers, and care coordination services for women and children in the Medical Assistance-managed care program. Referral services are provided for individuals with specific health issues (i.e., sexually transmitted diseases).

Services include instruction in preventive health practices, primary assessments, targeted dental services, and emergency services. Services are provided to income-eligible Montgomery County children, pregnant women, adults, and seniors.

Program Performance Measures	Actual FY20	Actual FY21	Estimated FY22	Target FY23	Target FY24
Number of pediatric dental referrals to outside pediatric specialist ¹	293	137	30	30	50
Percent of appointments that are missed/canceled	28%	11%	20%	20%	20%
Dental Services - Percent of children that complete their dental treatment plan ²	15%	16%	30%	30%	30%

¹ Since we began providing in-house pediatric services, there has been a dramatic reduction in the need to refer patients out for pediatric dentistry specialty services. For FY22, we have added a second pediatric dentist from University of Maryland to provide in-house pediatric dentistry services. This should cause a further reduction in the number of pediatric patients referred outside for services over the period from FY22 - FY24.

² Some reasons for the low percentage include: (1) There is a 2-3 month wait to get a dental appointment; (2) Parents cancel appointments or do not show for a variety of reasons; (3) Caries in our child population often necessitate 6 or 7 appointments to complete treatment (average number of visits to complete is three); and (4) A small number are completed at a specialist's office and are not reflected in the statistic.
