DESCRIPTION

This project provides funding for M-NCPPC to complete final design and construction of an 8-foot trail located in the Matthew Henson Greenway extending from Georgia Ave. to Alderton Ln., which is denoted as Phase 3 of the entire project and is approximately 2.25 miles. This project also provides for construction of the trail in Phases 1 and 2, which are 8-foot trails within the Matthew Henson State Park and extend from Rock Creek Trail to Georgia Avenue. (approximately 2 miles). The Montgomery County Planning Board approved the facility planning for this project on April 3, 2003, with the following stipulations: The project ecologist will review and evaluate changes to trail design during construction; Appropriate traffic controls will be implemented to provide a safe crossing for trail users at the intersection of the trail at Veirs Mill Road and Turkey Branch Parkway; The Department of Parks and Planning will develop a maintenance plan for the trail and trail corridor to be maintained by M-NCPPC; maintenance includes monitoring, maintaining, and restoring native habitat along the trail; periodic updates should be made to the Planning Board as ecological impacts are addressed.

Service Area

Kensington/Wheaton

JUSTIFICATION

The Matthew Henson Trail is in the Countywide plan of trails approved by the Planning Board in 1998. It provides an east-west link between Rock Creek Trail and Sligo Creek Trail. The trail system will serve more than 16,000 housing units.

Plans and Studies

Countywide Park Trails plan adopted by the Planning Board in 1998. In 1997, trail use was the most frequent activity reported by County survey respondents; 67 percent had used paved park trails in the past year. Biking and walking paths topped the respondents' list of desired facilities or greatest facility shortages. The design of Phase 1 and 2 of the Matthew Henson Trail were funded under the Hard Surface Design and Construction project and were performed by M-NCPPC. Traffic signals, street lights, crosswalks, bus stops, ADA ramps, bikeways, and other pertinent issues are being considered in the design of the project to ensure pedestrian safety.

Cost Change

Cost increase due to inflation and higher utility costs.

STATUS

Final design stage.

OTHER

In FY03, the Montgomery County Department of Environmental Protection constructed a stream restoration project in the Turkey Branch Watershed. This project has been coordinated with the Matthew Henson Trail project to decrease environmental impacts. This project will also be coordinated with Maryland Department of Natural Resources. On June 13, 2003, M-NCPPC forwarded a formal legal opinion to the County Council concluding that reimbursement of ALARF is not required for this project.

Commission staff will keep the community along the trail informed through newsletters and periodic meetings to ensure public information is shared regarding issues associated with the trail including design, construction, native habitat restoration, ecological and maintenance issues.

APPROPRIATION AND EXPENDITURE DATA

Date First Appropriation	FY04	(\$000)
Initial Cost Estimate		4,444
First Cost Estimate
