**D. Description & Justification**

**DESCRIPTION**

The project provides for planning, design and construction for the creation of a new pressure zone to serve the town of Laytonsville and surrounding communities. Community outreach, site selection, design, and construction of an 0.5 million gallon elevated storage tank and a 1.72 MGD pumping station will be part of this project. The purpose of this project is to provide public water service to existing residences and commercial properties in addition to new homes in the town of Laytonsville and the surrounding communities. To the extent that this project will add new hookups to WSSC's existing customer base, 100% of this project supports future growth. Refer to the definition of growth projects in the Expenditure Section of the Program Overview at the front of this document.

**Service Area** Montgomery High Pressure Zone HG660

**JUSTIFICATION**

**Plans & Studies**

A preliminary Study for the Proposed Water Service Area for Town of Laytonsville (October, 1999); Memorandum dated October 18, 2001, from the Manager of the Well and Septic Section, Montgomery County Department of Permitting Services, to Water and Waste Water Management, Montgomery County Department of Environmental Protection, finding that connection to the public water system will help address problems caused by groundwater contamination and lack of available septic replacement areas; Montgomery County Ten-Year Comprehensive Water Supply and Sewerage Systems Plan.

**Specific Data**

The preliminary Study for Proposed Water Service Area for the Town of Laytonsville indicates that, due to high ground elevations, a new pressure zone which entails a pumping station and an elevated storage tank is required. In May 2001, under CR 14-857, the Montgomery County Council acted to permanently restrict the provision of community water service from any properties in the town currently zoned AG and from any properties adjacent to or near the town within the county zoned RDT. The Town of Laytonsville filed a formal application for water service with the WSSC in November 2001.

**Cost Change**

Not Applicable

**STATUS** Preliminary Design (WSSC Contract No. BM2938A00, ).

**OTHER**

The project scope has remained the same. Expenditures shown in Block B are preliminary design level estimates and may change based on final bid. It is estimated that an additional \$1.85 million of non-CIP sized pipeline work will also be required. The expenditure and construction schedule presented above in Block B reflects that WSSC, the Developer of the Faulk's property, and the Town of Laytonsville have agreed to the funding mechanism for the Contribution/Other funding shown above in Block C.

**F. Approval and Expenditure Data (000's)**

Date First in Capital Program	FY 02
Date First Approved	FY 02
Initial Cost Estimate	58
Cost Estimate Last FY	3,920
Present Cost Estimate	4,074
Approved Request, Last FY	1,680
Total Expenditures & Encumbrances	582
Approval Request FY 09	1,162
Supplemental Approval Request Current FY (08)	

**G. Status Information**

Land Status: No land or R/W required  
 % Project Completion: D-75%  
 Est. Completion Date: October 2008
