Description

This project provides for the planning, design and construction of a replacement facility for the existing Avery Road Treatment Center (ARTC). The existing facility provides residential substance abuse treatment for low-income County residents. The County is pursuing a public-private partnership with assistance from the State to complete the project; therefore, only a portion of the likely total project costs are reflected here. The County has issued a Request for Proposals to secure a private partner for the project.

Location

14703 Avery Road, Rockville, Maryland

Capacity

The existing facility provides 20 medical detox and 40 Intermediate Care Facility beds. Capacity provided by the replacement facility may shift depending on the agreement developed under the public-private partnership.

Estimated Schedule

Funds are shifted to reflect an increase in the time required to complete the procurement process.

Justification

The existing ARTC facility was constructed of pre-fabricated modular units in 1991 and needs to be replaced.

Fiscal Note

The County is pursuing additional State and private support for the design and construction of this project. Project funding and expenditures shown here serve as a placeholder, intended to capture the amount of funding required to meet State match requirements. The Executive asserts that this project conforms to the requirements of relevant local plans, as required by the Maryland Economic Growth, Resource Protection and Planning Act.

Coordination

Department of Health and Human Services
 Department of General Services
 County Attorney
 Office of Procurement
 Maryland Department of Health and Mental Hygiene
 Private and/or non-profit substance abuse treatment providers
 Private developers
