PROJECT DESCRIPTION

The Energized Public Spaces Functional Master Plan (EPS Plan) is a countywide plan to provide public spaces within walking distance in the county's most densely populated areas. With rising populations in mixed use and higher density residential neighborhoods, parks and open space serve as "outdoor living rooms" that play a critical role in promoting livable and healthy communities, social interaction, and equity for residents of all ages and incomes. The EPS methodology provides data driven analysis that measures and prioritizes the park amenities needed to support contemplative, active recreation, and social gathering activities. The EPS Plan identifies multiple strategies to fill identified public space deficits with park activation programs, alternative providers, public-private partnerships, repurposing and improving access to existing public parkland, and acquisition of new parkland. This PDF provides the funding to acquire parkland to fill needs identified in the EPS Study Area using State of Maryland Program Open Space grants. Acquisitions will be prioritized based on multiple factors, including providing service to lower income and racially diverse areas, addressing the largest public space deficits, seizing on opportunity acquisitions, and locations of highest population growth and associated park needs. Sites within the EPS Study Area that are identified for park acquisition in other sector, master or functional plans also may be acquired with this PDF. The County Council encourages the Commission to seek supplemental appropriations if approved CIP funding is insufficient.
