<td>...</td>
<td>...</td>
<td>...</td>
<td>...</td>
</tr>
</tbody>
</table>

### GENERAL PLANTING NOTES

1. **Tree Planting:**
   - Ensure trees are planted at the correct depth (1/3 above the root collar).
   - Check soil compaction using a soil probing tool before planting.
   - Use appropriate mulch material to help conserve moisture and suppress weeds.

2. **Shrub Planting:**
   - Cut back any existing shrubs to encourage new growth and improve health.
   - Use a watering system to ensure proper hydration during the establishment period.

3. **Grass and Groundcover:**
   - Choose grass species that are well-adapted to the local climate and soil conditions.
   - Incorporate groundcover plants to control erosion and promote beauty.

### MORE PLANTING NOTES

- Always ensure proper spacing between plants to allow for adequate growth and resource utilization.
- Consider using native species to support local wildlife and ecosystems.
- Regularly monitor plants for signs of pests or disease and take necessary precautions.
