

I believe the clear intent of the County Council when enacting the ADU legislation in 2019 was to limit the licensing of ADUs to a property where the owner is **currently living there** when the application is made and not based on a promise to do so in the future. I believe this policy has been correctly in OZAH Case No. ADO 23-06 where the ADU was denied.

Given the applicant's past willful noncompliance with the county's rental housing rules this application should be denied.
