

Opposition Exhibit submitted 4-1-2026

On March 10, 2026, I was at the intersection of Pepperell Dr and Burdette Rd. when I saw these two cars speed by towards Royal Dominion Drive. They were coming from the direction of River Rd. I caught up to them at the light at Royal Dominion and River Rd. I took photos of the two cars. I spoke with the driver of the BMW. I asked if she was going to Holton and she said yes. I told her not to cut through our neighborhood. When the light turned green, both cars went straight across into Holton.

This illustrates how Holton traffic continues to use our neighborhood as a cut through. Allowing Holton to expand as per CBA-1174E would only exacerbate this problem. The Holton proposal to construct a dedicated left turn lane at this intersection would only encourage even more cutting through.

I ask that OZAH rule against both the expansion and any alteration to that intersection.

See the photos I took on the subsequent page.

Thank you

Steven Kaufman
