

Stephen Morel
Chief Executive Officer
Montgomery County Green Bank
155 Gibbs Street, Suite 407
Rockville, MD, 20850

January 13, 2025

To Whom It May Concern:

The Montgomery County Green Bank is proud to submit this letter in support of Davis Hill Development, a Skyview Ventures Company, for its proposed solar project in Montgomery County. As the County's designated green bank, our mission is to advance energy efficiency and renewable energy solutions that align with Montgomery County's commitment to achieving net-zero greenhouse gas emissions. Skyview Ventures has been a trusted partner in this effort, consistently demonstrating professionalism, innovation, and a strong commitment to sustainability.

Our partnership with Skyview Ventures has enabled the development of over 20 projects totaling 1.4MW of solar projects in Montgomery County over the past few years, including installations at Central Baptist Church in Rockville and Warner Memorial Presbyterian Church in Kensington. These projects exemplify the transformative power of renewable energy investments, achieving significant environmental benefits, reducing energy costs for nonprofits, and supporting community stakeholders. For example:

- At Central Baptist Church, a 148.42 kW community solar system generates 180,462 kWh of clean energy annually, avoiding 128 metric tons of carbon emissions each year. This project was made possible through innovative financing solutions facilitated by the Green Bank, enabling the church to participate in Maryland's community solar program without upfront capital investment.
- At Warner Memorial Presbyterian Church, a 72 kW solar project not only offsets the church's electricity use but also supports Housing Unlimited, a local nonprofit dedicated to affordable housing. Through the strategic allocation of community solar credits, Housing Unlimited saves up to \$1,400 annually, strengthening its mission while contributing to the County's sustainability goals.

Davis Hill Development, a Skyview Ventures Company, has consistently demonstrated excellence in project execution and long-term operations, ensuring that each project delivers measurable benefits. The Green Bank is particularly impressed by Skyview's commitment to integrating social equity into its renewable energy initiatives. By leveraging our financing relationship, Skyview has been able to offer competitive financing terms to its clients, ensuring the accessibility and affordability of clean energy solutions across the County.

Montgomery County*

GreenBank

Your partner for clean energy

As Montgomery County seeks to expand its renewable energy portfolio, Skyview Ventures stands out as a reliable and capable partner. Their track record of success, combined with their commitment to community impact, positions them as an ideal candidate for advancing the County's renewable energy goals.

We urge your favorable consideration of Davis Hill Development, a Skyview Ventures Company project proposal and look forward to continuing our collaborative efforts to build a more prosperous, sustainable, and equitable Montgomery County.

Sincerely,

Stephen Morel
