

What About Visio and Project?

Microsoft Visio and Project application upgrades to G3 are not part of this G3 transition. Traditionally these applications are purchased by the local departments.

The G3 upgrade is that it uses a different way to install programs. This is not compatible with the old method used with Visio and Project.

The net result is that when you either open the application or a previously created document using the application it will re-install. This is very annoying and time consuming.

Yearly Subscription Pricing is as follows:

Visio	\$111.99
Project	\$215.21

Please follow the same process as getting a G3 license to request and fund a G3 version of Visio or Project.
