

THE MICROSOFT MODEL IN A NUTSHELL

TO COMPETE WITH FREE SERVICES LIKE GOOGLE DOCS, MICROSOFT CREATED
"OFFICE 365". YOU GET TO IT THROUGH YOUR INTERNET BROWSER

It's not like
the current
version that
you get to
from your
desktop PC
at work.

Just like Google Docs, Office 365 is basic

BUT...
BECAUSE

Microsoft still wants to sell desktop
software (like Office 2010 and 2013) that
has a ton of advanced features!

SO WHAT DOES THAT MEAN?

That
means
we
have
options.

To save you

We're starting
with the basics.

For starters, DTS is buying
Office 365 for all staff.

So ANYONE with a county
email address can use
**Outlook, Word, Excel,
PowerPoint & OneDrive**,
from the web. Translation:
from ANYWHERE.

THANKS DTS!

Basic isn't enough?

Not to worry. For an annual fee, you can buy the
"G3 License" (sounds fancy!)

Well, it is...

With G3 you get
Office 2013

AND

you get to keep
Office 365

Do you
have to
change
now?

Microsoft 2003 is over a decade old. So if
you have it, you won't for long.

It's outta here on July 01!

Staff using Microsoft 2007 & 2010 don't
HAVE to change now, but you will. **SOON**.
So you might as well, if you can.

MAKE SENSE? NO? [CLICK HERE FOR MORE INFO](#)
