

HEADQUARTERS MEMORANDUM 01-06

File With: FC 1000

Distribution: All

Date: 04-23-01

Subject: Covert/Overt Traffic Operations

Stationary observation, either covert or overt, is used as a technique to make observations about traffic flow or enforce traffic laws at a particular location. In some instances, parking the police vehicle in, or observing from, an inconspicuous location may be an alternative when an officer sets up radar, laser, or conducts other selective enforcement. (CALEA 61.1.6.b)

Charles A. Moose, Ph.D.
Chief of Police
