

Norfolk Avenue Shared Street Facility Planning Study

MCDOT is conducting a feasibility study for Norfolk Avenue to explore options to enhance the streetscape and the existing streetery while permitting the safe movement of pedestrians and bicyclists through the space, loading and unloading needs for local businesses, as well as considerations for vehicular traffic.

We have worked to develop a design concept for Norfolk Avenue based on feedback gathered at our previous community meeting and through other outreach activities. Gain further insight by conversing with the project design team, and collaborate with your fellow community residents. We look forward to your input.

Join us for our Public Meeting:

Wednesday, September 20th, 6:30-8:30 pm
Bethesda-Chevy Chase Regional
Services Center, Wisconsin Room
4805 Edgemoor Ln, Bethesda, MD 20814
