Marjorie Williams noted the committee had received questions from the public. Shawn Thompson explained there was a question concerning antennas that were stacked one above another, and if the TFCG interprets the antenna length to be the combined length or each antenna individually. There are length limitations in Montgomery County on the permissible size of an antenna. In this case – Application 2021011356 – the proposed antenna installation would be installed on top of previously existing antennas on site. Each antenna has its own enclosure to hold the parts that make up the antenna. The existing antenna qualifies as its own antenna and enclosure and the new proposed antenna also qualifies as a separate antenna. These are considered independent and are each within the Zoning Ordinance’s length limits for antennas. In this case, the complicating factor is that there is an additional site enclosure, a concealment shroud that covers the radios and equipment and all three enclosed antennas too. Our interpretation of the regulation is that this is a separate shroud and does not impact our understanding of the three antennas as individual units. The TFCG Chair reached out to DPS and the County Attorney and they confirmed that we are interpreting the regulation in the way it was intended to be interpreted.

Michelle Grace made a motion that all items on the Consent Agenda be recommended. Martin Rookard seconded the motion. Felicia Hyatt abstained, and the motion was otherwise unanimously approved.

Subject: Antenna review

Sue

Good Afternoon. I am responding to the email that you wrote to Patricia Wolford in DPS on January 29, 2021. I have spoken to staff in DPS and the County Attorney's Office , each individual antenna is reviewed separately. Placing one antenna on top of another does not convert two antennas into one.
