ED COMMITTEE #2 February 23, 2015 **Worksession**

MEMORANDUM

February 19, 2015

TO:

Education Committee

FROM:

Essie McGuire, Senior Legislative Analyst

SUBJECT:

Worksession - FY16 Capital Budget and Amendments to the FY15-20 Capital

Improvements Program, Montgomery College

Today the Education Committee will begin its review of the FY16 Capital Budget and the Amendments to the FY15-20 Capital Improvements Program CIP) for Montgomery College. The following individuals are expected to be present today for this worksession:

- Dr. DeRionne Pollard, President, Montgomery College
- John McLean, Director of Capital Planning and Design, Montgomery College
- Kristina Schramm, Capital Budget Manager, Montgomery College
- Jennifer Bryant, Office of Management and Budget

OVERVIEW

The FY16 capital budget request for Montgomery College totals \$54.9 million. The six-year total amended CIP request is \$358.8 million, an increase of \$9.962 million over the approved FY15-20 CIP. The College's transmittal letter and summary tables are at circles 1-5. The College has requested the following CIP amendments in this off-year request:

- One new project, Collegewide Physical Education Renovations. This new project is proposed to be funded through the Major Facilities Capital Projects Fund and does not request any County dollars.
- Escalation costs for three projects: Rockville Student Services Center, Takoma Park Math and Science Center, and the Germantown Student Services Center.
- A one year delay in the project schedule for the Rockville Student Services Center.
- Escalation cost increase and FY16 construction appropriation for the Germantown Science and Applied Studies Building.
- Positions in two Collegewide projects, one in Planning, Design, and Construction, and one in the Energy Conservation Project. The College does not request additional County dollars for these positions in FY16.

The County Executive made the following recommendations in his FY16 capital budget:

- Supported the new Collegewide Physical Education Renovation project.
- Did not recommend approval of the requested escalation costs for the Rockville Student Services Center, Takoma Park Math and Science Center, and the Germantown Student Services Center.
- Concurred with the one year delay in the project schedule for the Rockville student Services Center.
- Supported the FY16 escalation cost increase and construction appropriation for the Germantown Science and Applied Studies Building.
- Did not recommend approval of the two requested positions.
- Assumed an overall reduction in GO Bonds of \$4.3 million in FY16-18 through the College Affordability Reconciliation PDF, but did not make project specific recommendations to allocate these reductions.

The table below summarizes the College's request and the Executive's recommendation relative to each other and the current approved level.

	6 yr total	FY15	FY16	FY17	FY18	FY19	FY20

NEW PROJECT

Collegewide Physical Education Renovation Project (PDF on circle 6)

The College requests a total of \$4.2 million in FY16 for this new Collegewide project. No County funds are requested, as the College proposes to fund this project from the Major Facilities Capital Projects Fund, which is supported by student fees. The County Executive supported this project.

In 2013 the College completed a building condition assessment that evaluated deficiencies and cost estimates for repairs. This project is intended to address major building repair issues including HVAC and other systems at the Germantown Physical Education Building, the Rockville Physical Education Center, and the Takoma Park/Silver Spring Falcon Hall Building.

Council staff recommends approval.

REQUESTED POSITIONS

The College requests two new positions with no additional County dollars associated in FY16. The County Executive did not recommend approval of either position. The College's requested PDFs and the Executive's recommended changes are on circles 16-19.

- Energy Conservation project: This position is not anticipated to require additional County funds in the six year period but is proposed to be funded within the approved level of funding. The College states that this position is needed to address workload associated with the environmental benchmarking legislation adopted by the Council last spring.
- Planning, Design, and Construction: While the College is not requesting new County dollars to
 support this position in FY16, it does anticipate requesting local funding for the position in the
 FY17-22 CIP and going forward. The College states that this position would add an architect that is
 needed to keep up with the overall workload and scope of work for the College's capital program
 and growing multi-campus infrastructure.

Council staff recommends approval of both positions. At a minimum, Council staff supports the position in Energy Conservation that does not require local funds. Council staff also supports the College's need for additional architect capacity, and local funding will not be necessary until FY17.

GERMANTOWN SCIENCE AND APPLIED STUDIES BUILDING RENOVATION (PDF on circle 7)

	6 yr total	FY15	FY16	FY17	FY18	FY19	FY20
Approved	36,006	1,510	14,827	19,669	0	0	0
College	37,370	1,510	15,420	20,440	0	0	0
CE	37,370	1,510	15,420	20,440	0	0	0
Difference:	1,364	0	593	771			
Rec-App							

This project provides for phase one of the Germantown Science and Applied Studies Building renovation, which will focus on the second floor of the building and an addition to support Physics, Engineering, and Math departments. It includes laboratory spaces as well as classroom and office spaces.

The College's request reflects the addition of State allowed escalation costs and an appropriation of construction costs scheduled for FY16-17. The County Executive stated that he supports this project and the requested cost escalation. The escalation increase is a total of \$1.4 million in the two years, split between the County and State at approximately \$682,000 each.

Council staff comments: While the Executive stated that he recommends approval of this project, his Affordability Reconciliation PDF takes \$2 million in unspecified reductions from FY16. If the Committee recommends approval of the College's requested escalation for this project, then the Executive's recommended FY16 affordability reductions would have to come from other projects or be added to the CIP. Council staff notes that a reduction in County funds would result in an equal reduction of State funds for the project.

ROCKVILLE STUDENT SERVICES CENTER (PDFs on circles 9-10)

	6 yr total	FY15	FY16	FY17	FY18	FY19	FY20
Approved	63,848	3,459	26,856	33,533	0	0	0
College	66,188	3,459	0	27,930	34,799	0	0
CE	63,848	3,459	0	26,856	33,533	0	0
Difference:	2,340	0	(26,856)	(5,603)	34,799	0	0
College-App							
Difference:	(2,340)	0	0	(1,074)	(1,266)	0	0
CE-College							

The College's request delays this project schedule by one year, resulting in construction anticipated in FY17-18. The College also requested an escalation increase for the project, totaling \$2.34 million over the two years, split approximately \$1.17 million between the County and the State. The Executive assumed the one year project delay but did not approve the requested escalation increase, resulting in a GO Bond reduction of \$537,000 in FY17 and \$633,000 in FY18 from the College's request (the total reduction shown in the table above includes the related State Aid reduction).

This project was recently reduced to meet affordability constraints. In the FY13 review of the CIP, the project received a 10 percent reduction in construction costs, totaling \$5.4 million, and an additional reduction in information technology funding of \$1.8 million. The requested project escalation for FY17-18 would restore less than half of the previous construction cost reduction.

Council staff comments: Council staff understands that restoring the requested escalation for this project is a high priority for the College, particularly given that the project was previously reduced and that the construction is to begin in FY17. The Committee may want to ask the College to comment on the project scope impact if the escalation is not applied in this CIP amendment. Council staff also notes that the Executive's unspecified reductions are in addition to his assumed reduction in this project in FY17-18; if the Committee wished to restore the requested escalation funding it would add to the affordability gap between the Executive's recommendations and the College's request.

OUT YEAR ESCALATION INCREASES

The College requested cost escalation increases in two projects scheduled for the outyears of the CIP:

- Germantown Student Services Center: \$564,000 (\$282,000 in GO Bonds) FY19-20
- Takoma Park/Silver Spring Math and Science Center: \$1.5 million (\$747,000 GO Bonds) FY18-20

The Executive did not recommend reflecting these escalation costs at this time. The project PDFs and the recommended changes are on circles 12-15.

Council staff comments: Council staff concurs with the Executive's position to level fund these projects given that they are much later in the CIP and that the projects have not yet entered the planning phases.

COLLEGE AFFORDABILITY RECONCILIATION (PDF on circle 20)

As noted earlier, the County Executive assumed a six year total reduction of \$4.3 million from the College's request in addition to his project specific reductions. These reductions are assumed to be \$2 million in FY16; \$300,000 in FY17; and \$2 million in FY18. The Council must approve the CIP by project, and so will have to reconcile these unspecified reductions by either taking the reductions in specific projects or by adding funds to the CIP to restore the Executive's reductions.

Today the Committee may want to discuss options for how to address this affordability PDF. Council staff provides the following overview information as context for how the reductions might affect the College's CIP request.

Major construction projects: It is very problematic to take reductions from projects already in construction. The College's CIP request has four major construction projects not yet in construction; these are discussed above in more detail. The only one with FY16 funding is the Germantown Science and Applied Studies Building. The Executive already reduced the College's requested escalation increase for the other three, so to take more reductions from these projects to meet his affordability reductions would take them below the currently approved level. It would also result in a corresponding reduction of State Aid.

Collegewide projects: The College has several level of effort projects that have bond funding and could be reduced to meet the unspecified reductions. These projects have total combined funding of approximately \$7.4 million in FY17, \$8.0 million in FY18, and \$8.9 million in FY19 (these totals are not exclusively GO Bonds and include some other resources). Several of these projects were reduced in recent years to meet affordability, including PLAR, Elevator Modernization, and Capital Renewal. The approved CIP generally maintains the reduced levels for these projects through FY17 and then returns to higher level funding in FY18.

One option to allocate the Executive's unspecified reductions would be to continue the reduced level of funding for projects such as PLAR and Capital Renewal from FY18-20. This does not meet the same years as recommended by the Executive but would reduce the CIP totals. For example, PLAR was reduced by \$1.3 million each year FY15-17; continuing this \$1.3 reduced level of funding from FY18-20 would take \$3.9 million from the requested CIP. Council staff appreciates that the College, as do all County agencies, has an extensive backlog of work needed in systemic infrastructure areas such as PLAR.

For the Committee's next worksession, it may be helpful to have a sense of how the College would prioritize its CIP projects relative to the Executive's reductions. The Committee may want to ask the College and Council staff to provide a more specific plan to meet these reductions in time for the next Committee review of the College CIP. The Committee can then make project based funding decisions about how to reconcile the College's request.

Rockville, Maryland 20850

Re: FY16 Capital Budget Request FY15-16 Biennial Capital Budget and FY15-20 Capital Improvements Program

Dear Mr. Leggett and Mr. Rice:

We respectfully transmit for your consideration the Montgomery College FY16 capital budget request as part of the FY15-16 biennial capital budget, and FY15-20 capital improvements program.

The Board of Trustees and I are grateful for your support of Montgomery College and the students we serve—the workforce of tomorrow. The College's vision statement calls upon us to act with a sense of urgency to meet the dynamic challenges facing our students and our community - to help move Montgomery County forward.

Montgomery College plays a vital role in this effort as we are the path to degree for many Montgomery County Public Schools (MCPS) graduates. Studies show that sixty percent of MCPS graduates who stay in state to attend college begin at Montgomery College. Our graduates contribute to a strong and vibrant local economy, for over the course of a working lifetime, graduates with associate's degrees earn \$639,000 more than someone with only a high school diploma.

Your community's college is an escalator for our students to reach the middle class, which helps to create a strong tax base for our community. And we know that the jobs of today, and those of the future, all require a post-secondary education, all of which makes our role for the future of our community even more important today. Your continued support will enable us to help keep our community strong and move Montgomery County forward, as was so eloquently called for in the recent state of the county address.

Nonetheless, we recognize fiscal challenges remain. As a result, our request is fiscally prudent despite aging facilities and continuing space challenges. Montgomery College has the largest space deficit of any community college in Maryland, totaling 727,151 net assignable square feet. The FY16 capital budget request totals \$54,862,000 for twenty-nine projects on the three campuses of the College.

The Honorable Isiah Leggett
The Honorable Craig Rice
Members of Montgomery County Council
November 11, 2014
Page 2

Since the FY16 request is an "off-year" request, the county requires that new (or revised) capital project requests meet certain amendment criteria (such as major cost changes) in order to be considered. The following is a list of the FY16 project amendments. The College's FY16 project amendments meet the county's amendment criteria.

- Among the FY16 project amendments, the College defers the Rockville Student Services Center construction request of \$50,140,000 from FY16 to FY17.
- > The next amendment creates a new collegewide Physical Education renovations project for the FY16 capital budget. Although this is a new project for FY16, no county funds will be requested as the College will fund this project from the major facilities capital projects fund.
- ➤ The College requests an appropriation of \$30,840,000 for the construction of the Germantown Science and Applied Studies Building renovation and addition (\$15,420,000 in county funding, and \$15,420,000 in state funding). This includes a four percent increase for state allowed cost escalation.
- > Two positions are requested within the FY16 budget cycle, however additional county funding is not requested for these new positions in FY16 since there are sufficient funds within the corresponding projects.
 - The planning, design, and construction project request includes one new position for an architect, in response to increased workload associated with the implementation of the capital budget.
 - The energy conservation project request includes one new position for a utilities manager, which is in response to additional requirements recently implemented by the county.

During the past year, the College has made considerable progress on several projects. These projects are designed to help prepare the workforce of tomorrow; to advance the economic development goals of the county; and to provide 21st century learning environments that enable students to succeed whether in a workplace lab, or their next classroom. On the Rockville Campus, the Science East Building renovation was completed and opened for the spring 2014 semester. The renovation of the Science West building will complete the math/science complex on the Rockville campus which is the epicenter of the largest engineering program at a community college in the United States.

At the Germantown Campus, the Bioscience Education Center was completed and opened for fall 2014 semester, and design is underway for the follow-on renovation of the Germantown Science and Applied Studies Building. Both facilities will enhance our ability to help the biotech industry grow and will support the county's efforts to attract high-skill, high-wage, cutting-edge industries. At the Takoma Park/Silver Spring Campus, construction of the Pavilion Three building renovation began during summer 2014, and is anticipated to open for fall 2015 classes. This renovation is part of the continued effort to fully revitalize this campus, which is one of the state's oldest campuses, and will ensure Maryland's most diverse campus has quality classrooms and labs. This project is funded from the Capital Renewal project.

The Honorable Isiah Leggett
The Honorable Craig Rice
Members of Montgomery County Council

Montgomery County needs a strong community college with high-quality learning environments to help move our community forward, to help our all of our residents have access to the American Dream, and to leverage your efforts to attract and maintain high-skill, high-quality jobs in Montgomery County. Whether this county needs mechanics or engineers, Montgomery College can help Montgomery County move forward.

Again, thank you for your continued support of the College, our mission and our students.

Sincerely,

DeRionne P. Pollard, PhD

President

Description

This project provides funding for the renovation of physical education buildings on the Montgomery College's three campuses, specifically the Germantown Physical Education building, the Rockville Physical Education Center, and Takoma Park/Silver Spring Falcon Hall building. The College completed a facilities condition assessment of these buildings in December 2013 that evaluated all building systems and related equipment and identified major repair and/or replacement requirements.

Justification

The Germantown Physical Education building was constructed in 1980, and is 34 years old. The Rockville Physical Education Center was constructed in 1966, and is 48 years old. The Takoma Park/Silver Spring Falcon Hall building was constructed in 1978, and is 36 years. All three of these buildings are experiencing a progressive deterioration of building systems and major pieces of building equipment. It has now reached the point that addressing the problem of a deteriorating building infrastructure is beyond the scope of a maintenance effort and that building repairs are no longer adequate or cost effective. Key components of the HVAC, mechanical and electrical systems are outdated, energy inefficient, and costly to continue to repair. The refurbishment and/or replacement of major building systems and related equipment will significantly extend the useful life of the building and correct safety and environmental problems. The College completed a building condition assessment in 2013 that provides a detailed evaluation of building deficiencies and initial cost estimates for major repairs, equipment replacements, and related improvements. Related studies include: the Collegewide Master Plan Update (1/13), and the Collegewide Facilities Condition Assessment (12/13).

Other

FY16 Appropriation: \$4,200,000 (Major Facilities Capital Projects Fund-MC only).

Coordination

Energy Conservation: College (CIP No. P816611), Planned Lifecycle Asset Replacement: College (CIP No. P926659), Roof Replacement: College (CIP No. P876664).

Description

This project provides for the realignment/renovation of space in the Science and Applied Studies building (65,015 GSF) on the Germantown Campus in accordance with the College's Facilities Master Plan (9/10) and the building educational space specifications. The renovated building will house open class labs, classrooms, offices and support space related to the physics, engineering, and mathematics departments. The Science and Applied Studies Renovation will occur in two phases. The first phase involves the renovation of the second floor, and a 29,330 GSF building addition, to support the Physics, Engineering, and Mathematics disciplines. There will be vacant space in the building when various departments move to the Bioscience Education Center, which makes it necessary to renovate this building to The current building layout is inappropriate for the Physics, Engineering, and Mathematics departments, which support new disciplines. makes it necessary to renovate laboratory spaces, classrooms, and faculty and staff offices. This building also has outdated laboratory equipment, which does not properly support the new functions, and technological changes in teaching methods. Programmatic changes are necessary to prepare this building for these uses. The second phase of this project will deal with the renovation of the first floor. Overall growth at the Germantown Campus in combination with the transition to lab instruction for mathematics and engineering expansion has created the demand for additional academic space. Renovation for these disciplines co-locates them near the Bioscience Education Center, creating good programmatic synergy on the campus. Renovation of this facility is contingent on completion of the Bioscience Education Center. Based on student interest, enrollment trends, existing and projected County and State workforce needs, and the teaching and learning strategies, including the final report of The Governor's Science Technology Engineering Mathematics Task Force, Investing in STEM to Secure Maryland's Future, the Germantown Campus will be well positioned to meet the needs of its students and the region. Design funding for this project was appropriated in FY13.

Estimated Schedule

Project construction is scheduled to be completed in the Winter of 2017

Cost Change

The cost of this project has increased to match the State's allowed cost escalation factor (4%).

Justification

Under the application of the State space guidelines, the enrollment growth on the Germantown Campus has resulted in a significant instructional space deficit. The Germantown Campus has a 2022 projected instructional space deficit of 132,252 NASF and a total space deficit anticipated to be 227,390 NASF. In addition, this project will position the College to address workforce shortages in the Science, Technology, Engineering, and Mathematics fields. This project will impact local and Maryland workforce shortages through educating students to fill technical jobs. Relevant studies include the Collegewide Facilities Master Plan Update (1/13), the Renovation/Addition to Sciences & Applied Studies Building at Montgomery College Germantown Campus, Part 1, Part 2 (3/11), and the Collegewide Facilities Conditions Assessment Update (pending 11/13),

Germantown Science & Applied Studies Phase 1-Renov (P136600)

Other

FY15 Appropriation: \$0

FY16 Appropriation: \$30,840,000 Total; \$15,420,000 (G.O. Bonds), \$15,420,000 (State Aid).

Project expenditures assume that a portion of Information Technology (IT) equipment costs may be funded through the Information

Technology (No. P856509) project.

The construction costs in the expenditure schedule (\$30,840,000) include: site improvement costs (\$2,390,000), building construction costs (\$28,450,000). The building construction cost per gross square foot equals \$438 (\$28,450,000/65,015).

Disclosures

A pedestrian impact analysis has been completed for this project.

Montgomery College (A15) asserts that this project conforms to the requirements of relevant local plans, as required by the Maryland Economic Growth, Resource Protection and Planning Act.

Description

This project provides funds for the construction of a new student services center (125,322 gross square feet) to support student administrative services as outlined in the Rockville Campus Facilities Master Plan, 2006-2016 (9/10). This project brings together student and administrative services to support the concept of one stop shopping services for students. Specifically, it will include the following campus related functions and activities: Admissions and Registration, Financial Aid, Cashier, Dean of Student Development, Career Transfer Center, Assessment, Counseling, Disabled Student Services (DSS), and Trio program plus support services such as a training facility, storage, resource library and waiting areas. In addition, this building will house the Office of Safety and Security and a new parking department. This project also includes funding for a central plant located in the Student Services Center and funding for a road extension/site improvements related to the building.

Estimated Schedule

Project construction is scheduled to be completed in the winter 2019.

Cost Change

Project expenditures assume that a portion of Information Technology (IT) equipment costs may be funded through the Information Technology (No. P856509) project. The cost of this project has increased to match the State's allowed cost escalation of 4%.

Justification

Currently, these intake functions are fragmented and are insufficiently accommodated: Student Development is located in the Counseling & Advising Building; the assessment program is located in Campus Center, Admissions, Registration and Financial Aid are located in the Student Services Building. Bringing these functions under one roof will be of great benefit to students by increasing the efficiency of the intake operations. Relevant studies include the Collegewide Facilities Condition Assessment (pending 11/13), the Collegewide Facilities Master Plan Update (1/13), and the Rockville Student Services Center Part 1/Part 2 (5/11).

Ofher

FY15 Appropriation: \$0. FY16 Appropriation: \$0. Relocation costs and design fees above approximately 7% of estimated construction costs may not be eligible for State reimbursement.

The construction costs in the expenditure schedule (\$52,146,000) include: site improvement costs (\$9,275,000), building construction costs (\$42,871,000). The building construction cost per gross square foot equals \$342 (\$42,871,000/125,322).

Disclosures

A pedestrian impact analysis will be performed during design or is in progress.

Description

This project provides funding for the design and construction of a new academic building (134,600 gross square feet) supporting science programs, such as Biology, Chemistry, and the Physical Sciences, and the Mathematics Department, as described in the Takoma Park Campus Facilities Master Plan, 2006-2016 (9/10). The science and math complex will be completed in two phases, beginning with the demolition and replacement of Science South, followed by the demolition and replacement of Science North.

Cost Change

The current estimated cost, shown in the Beyond 6 Years column, for other (furniture, fixtures, and equipment) is \$9,866,000, pending completion of final design.

The cost of this project has increased to match the State's allowed cost escalation factor (4%).

Justification

Under the application of the State space guidelines, the enrollment growth on the Takoma Park/Silver Spring Campus has resulted in a significant instructional space deficit. The Takoma Park/Silver Spring Campus has a Fall 2012 laboratory space deficit of 82,600 NASF and a total space deficit of 92,725 NASF. Even with the completion of the Takoma Park Campus Expansion Project and the Cafritz Foundation Art Center, the 2022 projected laboratory space deficit is 104,640 NASF and the total space deficit is anticipated to be 163,318 NASF. The construction of the Math & Science Center will address this deficit as well as replace Science North and Science South that are in exceedingly poor condition (as identified in the Collegewide Facilities Condition Assessment, 11/07). In addition, the replacement of Science North and Science South allows the campus to capitalize on site capacities with large buildings, given the restricted development opportunities available on the campus. Relevant studies include the Collegewide Facilities Condition Assessment Update (pending 11/13), and the Collegewide Facilities Master Plan Update (1/13).

Other

Funding Sources: G.O. Bonds and State Aid State share of project is based on anticipated eligible costs. Relocation costs and design fees above approximately 7% of estimated construction costs may not be eligible for State reimbursement.

The construction costs in the expenditure schedule (\$65,762,000) include: site improvement costs (\$4,529,000), building construction costs (\$61,503,000). The building construction cost per gross square foot equals \$456 (\$61,503,000/134,600).

Disclosures

A pedestrian impact analysis has been completed for this project.

Montgomery College (A15) asserts that this project conforms to the requirements of relevant local plans, as required by the Maryland Economic Growth, Resource Protection and Planning Act.

Recommendation

APPROVE WITH MODIFICATIONS

The Executive recommends deferring construction escalation cost increases until the full CIP due to the timing of construction, which begins in FY19-20, and the preliminary nature of the current cost estimates.

Description

This project provides funds for the design and construction of a new student resource center (approximately 120,400 gross square feet) to support both study and student services as outlined in the Germantown Campus Facilities Master Plan, 2006-2016 (9/10). This project provides a comprehensive one-stop shop and brings together the Cafeteria, Bookstore, and Mailroom from the Humanities and Social Sciences Building, Admissions, Student Life and Security from the Science and Applied Studies Building, creating much more space for study and student development. This building will also house the Provost's Office, as well as media and academic computing support functions. This building will be located at 20200 Observation Drive, Germantown, MD 20874.

The current estimated cost shown in the Beyond 6 Years column for other (furniture, fixtures, and equipment) is \$10,986,000 pending final design

Project expenditures assume that a portion of Information Technology (IT) equipment costs may be funded through the Information Technology (No. P856509) project. The cost of this project has increased to match the State's allowed cost escalation factor (4%).

Justification

Supported in this facility are the media resources and academic computing functions, including the computer training lab. The advantage for students is the concentration of support resources in a single location. For the campus, space is made available in other buildings that will allow more growth in office and instructional space before another academic building is needed on campus. Under the application of State space guidelines, the enrollment growth on the Germantown campus has resulted in a significant space deficit. The Germantown campus has a fall 2012 space deficit of 208,327 NASF, and a 2021 projected space deficit of 227,390. Relevant studies include the Collegewide Facilities Master Plan Update (1/13).

Other

Funding Sources: G.O. Bonds and State Aid. State share of project is based on anticipated eligible costs. Relocation costs and design fees above approximately 7% of estimated construction costs may not be eligible for State reimbursement.

The construction costs in the expenditure schedule (\$65,890,000) include: site improvement costs (\$13,424,000), building construction costs (\$52,466,000). The building construction cost per gross square foot equals \$435 (\$52,466,000/120,400).

Disclosures

A pedestrian impact analysis has been completed for this project.

Montgomery College (A15) asserts that this project conforms to the requirements of relevant local plans, as required by the Maryland Economic Growth, Resource Protection and Planning Act.

Description

This project provides for fifteen full time positions in the Facilities Office. These positions plan, design, manage and implement the Coilege's capital program which extends beyond the current six years. These fifteen positions are broken down into 3 categories: Project Management Staff; Design Staff; and Construction Staff. The positions that are categorized as Project Management Staff are Project Managers (8), and Project Support Staff (1). The Project Managers are responsible for budget development, program planning, and project management through to completion. The Project Support Staff supports the goals of the Project Managers. The positions that are categorized as Design Staff are Architect (1), Engineer (1), and Architectural Drafter/Designer (1). The final category is Construction Staff, which consists of a Construction Services Supervisor (1), and Construction Trades Workers (2), who are responsible for completing small, in-house construction projects. The FY16 request includes one new position for an architect, which is in response to increased workload associated with the implementation of the capital budget. Since there are sufficient funds within the request, additional County funds are not requested for this position.

Justification

The above staff supports the increased work load associated with the College's CIP and complements the existing staff expertise. The College's CIP has increased substantially since the mid-1980s and the then existing staff could no longer support the additional projects.

Other

FY2015 Appropriation: \$1,484,000; \$742,000 (G.O. Bonds) and \$742,000 (Current Revenue: General). FY2016 Appropriation: \$1,484,000; \$742,000 (G.O. Bonds) and \$742,000 (Current Revenue: General).

The following fund transfers have been made from this project: \$111,000 to Information Technology (#P856509) (BOT Resol. #91-56; \$400,000 to the Takoma Park Expansion project (#996662) (BOT Resol. #07-01-005, 1/16/07). The following fund transfer has been made into this project: \$28,000 (\$7,000 each) from ADA Compliance (#P936660), Energy Conservation (#P816611), Facility Planning (#P886686), PLAR (#P926659) (BOT Resol. #01-153), and \$150,000 from the Takoma Park Campus Expansion (#P996662) (BOT Resol.#11-06-078, 06-20-11). During FY87-89, certain personnel costs were charged to individual capital projects. As some staff work is required on every capital project, separately identifying staff funding is an efficient and cost effective method of management for the College and provides a clear presentation of staff costs.

Disclosures

Expenditures will continue indefinitely.

Description

This project provides funding to (1) continue development of a Collegewide energy management program, (2) implement life-cycle cost effective energy conservation measures based upon energy audits, and (3) review new building/renovation designs for compliance with Montgomery County Code, Ch. 8 Building Energy Performance Standards. Typical project activities include retrofits and modifications of lighting, controls, and HVAC equipment; building envelope modifications; solar energy retrofits; computer equipment for equipment control and energy-use monitoring; HVAC system evaluation/balancing studies; long-range energy/utility planning studies; central plant design plans (Germantown, Rockville, Takoma Park/Silver Spring); and waste management studies. Typical payback on lighting, controls, HVAC and solar energy modifications is five to six years. The FY16 request includes one new staff position for a Utility Analyst which is in response to increased workload associated with County Council Bill No. 2-14, Benchmarking, which was enacted by Council on April 14, 2014. Since there are sufficient funds within the request, additional County funds are not requested for this position.

Cost Change

Increase due to the addition of FY19 and FY20.

Justification

As mandated by Ch. 8 of the County Code and supported by the College, County Council, the Interagency Committee on Energy & Utility Management (ICEUM), and the Citizens Energy Conservation Advisory Committee (ECAC), an energy cost reduction program has been developed. This program consists of energy audits performed by College staff to identify life cycle cost effective retrofits, including a lighting retrofit program, LEED certification, etc.

Description

This project reconciles the request of the Board of Trustees of Montgomery College with the County Executive's recommendation. Fiscal constraints lead the Executive to adjust the annual amounts to be affordable within the CIP. The Executive's recommendation provides 98.8 percent of the total Montgomery College Capital funding for the six-year period.
