#### MEMORANDUM

July 20, 2022

TO: Public Safety Committee

Transportation & Environment Committee

FROM: Ludeen McCartney-Green, Legislative Attorney

SUBJECT: Bill 36-21, Motor Vehicles and Traffic – E-Scooters – Operation Requirements and

Registration

PURPOSE: Worksession 2 – Committee recommendation expected

#### **Expected attendees:**

Hannah Henn, MCDOT Gary Erenrich, MCDOT Sande Brecher, MCDOT Elaine Bonner-Tomkins, OLO Robert Gardner, Lime (invited) Perry Holmes, Bird Rides, Inc. (invited) Breanna Bledsoe, Spin (invited)

Bill 36-21, Motor Vehicles and Traffic – E-Scooters – Operation Requirements and Registration, sponsored by Lead Sponsor Councilmember Katz with Co-Sponsor then Council Vice-President Albornoz, was introduced on October 19, 2021. A public hearing with one speaker was held on November 9, 2021. An initial joint Public Safety and Transportation & Environment Committee worksession was held on January 27, 2022. A second worksession is scheduled for July 25, 2022.

#### BACKGROUND

Bill 36-21 would permit a person to register an electric low-speed scooter (e-scooter) owned by a County resident for personal use. The owner of 2 or more e-scooters would be required to register and pay a fee for an e-scooter fleet offered for rent in the County. The Bill would also establish operating and parking requirements for e-scooter use in the County.

Bill 36-21 is similar to Bill 8-20, Bicycles and E-Scooters – Operating Requirements and Registration, introduced on March 3, 2020. Bill 8-20 was recommended for approval by a joint Public Safety and Transportation and Environment Committee, with amendments, on June 25, 2020. However, Bill 8-20 was never considered by the full Council before expiring September 3, 2021 due to the global COVID-19 pandemic. Bill 36-21 includes the amendments approved by the joint committee last June.

The County Attorney's Office concluded that the Bill had no legal impediments (©9). OCA pointed out that the phrase on line 70 "600 feet to 100 feet" may be a typo and should read "60 feet to 100 feet." However, MCDOT and industry representatives at the January 27 worksession confirmed the bill accurately states, "600 feet" and remains consistent with the requirements under state law.

#### **PUBLIC HEARING**

Hannah Henn, Deputy Director, MCDOT, representing the Executive, supported the Bill (©29). Perry Holmes, representing Bird Rides, Inc., submitted written testimony supporting the Bill and describing his company's efforts to promote helmet use and safe scooter operation in the County (©26).

#### SUMMARY OF FIRST WORKSESSION – JANUARY 27

Hannah Henn, Deputy Director, MCDOT, Gary Erenrich, MCDOT, and Sandra Brecher, MCDOT represented the Executive Branch. Perry Holmes, Bird Rides, Inc., and Breanna Bledsoe, Spin, answered questions from the Committee. Elaine Bonner-Tomkins, OLO, and Senior Legislative Attorney Robert Drummer represented the Council staff.

The Committee discussed the provisions of the Bill and the recommendations of the RESJ Impact Statement. (©18). MCDOT representatives explained that the current agreement with each of the e-scooter rental companies operating in the County entered an agreement with the County covering their operation. Under the current agreements, the companies already provide a cash option for customers, a discount program for low-income residents and senior residents, and a free helmet program. MCDOT also told the Committee that most of the current use of e-scooters is in Equity Emphasis areas of the County. MCDOT representatives also told the Committee that they run a monthly educational event in the County with one of the rental companies where residents are given instructions on how to safely operate an e-scooter and a free helmet. The Committee agreed that the Executive should retain the flexibility to establish the operating requirements for this new and quickly changing industry.

The Committee also discussed the need to align some of our helmet requirements, the minimum age for operating e-scooters, operating restrictions, and parking regulations with our neighboring jurisdictions and requested Council staff to work with MCDOT to provide this information for a future worksession. Gary Erenrich offered to prepare a spreadsheet showing the different requirements for other local jurisdictions, such as DC, Arlington, Fairfax, and Alexandria.

Councilmember Hucker also questioned the application of the minimum age requirement for personal use e-scooters since there are many low-powered e-scooters that are marketed to children as toys.

#### REMAINING ISSUES FOR DISCUSSION

#### 1. Comparison of Local Jurisdiction Mircomobility Policies

As requested by the joint committee, MCDOT has prepared a comparison chart identifying several local jurisdiction mircomobility policies. (©30).

A review of the chart indicates a few notable comparisons and distinctions:

#### a. Helmet Requirement Over 18 years old

- Bill 36-21, as introduced, would be consistent with local jurisdictions by *not* requiring a helmet for ages 18 and over. (©30).

#### b. Helmet Requirement for Minors

- Arlington County requires a person 14 years and younger to wear a helmet.
- Fairfax County does not have the authority to regulate helmets although many companies do voluntarily. 1
- Alexandria has helmet regulations for bicycles, but not e-scooter.

#### c. Age Requirements to Rent Shared Mobility

- To rent an e-scooter from a mircomobility vendor in Arlington, Alexandria, D.C., or Fairfax, the rider must be at least 18 years old, and some vendors require verification of a driver's license for proof of age.
- MCDOT's MOU with the vendor requires riders to be at least 18 years old.

#### d. Registration of E-Scooter

- Alexandria, D.C., and Fairfax require registration for shared or commercial use of an e-scooter.
- Arlington County permits a person to voluntarily register an e-scooter for personal use.

#### e. Payment Options

- Most jurisdictions require alternative payment options to account for non-mobile device users. A cash or gift card option must be available. In addition, to encourage ride discount programs with certain vendors may be available for low-income communities to encourage ridership. (©30). The County's current practice to require cash option is consistent with other jurisdictions.

#### f. Geographic Distribution

- According to the National League of Cities, the most common equity tool utilized is requirements for charged e-bikes and scooters to be equitably distributed across city neighborhoods.<sup>2</sup>

<sup>&</sup>lt;sup>1</sup> Shared Mobility Devices. <a href="https://www.fairfaxcounty.gov/cableconsumer/csd/shared-mobility#:~:text=Rules%20of%20the%20Road,normal%20car%20or%20foot%20traffic.">https://www.fairfaxcounty.gov/cableconsumer/csd/shared-mobility#:~:text=Rules%20of%20the%20Road,normal%20car%20or%20foot%20traffic.</a>

<sup>&</sup>lt;sup>2</sup> National League of Cities – Micromobility in Cities. <a href="https://www.nlc.org/wp-content/uploads/2020/11/Micromobility">https://www.nlc.org/wp-content/uploads/2020/11/Micromobility</a> Report 2020.pdf

- There are several jurisdictions, including Alexandria, Arlington County, Baltimore City, and D.C. that mandate a certain number of e-scooters must be equitably distributed in areas. For example, in D.C. vendors are required to deploy at least 3 percent of their fleets to each of the district's eight wards between 5 and 7 a.m. daily. (©30).
- As MCDOT continues to evaluate and expand its emerging pilot program by offering mircobility shared devices in select areas of the County, the program promotes vendors to use "best efforts" for equitable distribution, rather than a mandate. (©32).

### 2. How does the Bill differentiate between adult e-scooters for personal use versus child e-scooter for recreational use?

At the January 27 worksession, the Committee discussed whether a scooter marketed for a child as a toy would fall under this legislation. Currently, the Bill does not differentiate between an adult e-scooter for personal use or an e-scooter used by a child for play or leisure. Therefore, the Committee may wish to consider the following amendments that would carve out an exception for a child who rides an e-scooter for recreational use.

Inset line 6, as follows:

*Child* means an individual under the age of 14 years old.

Amend line 18, as follows:

*Electric low speed scooter* does not include:

- (1) an electric personal assistive mobility device; [[or]]
- (2) an electric wheelchair or other mobility aid used by a disabled individual; or
- (3) an electric scooter used by a child for recreational use that has:
  - (A) a maximum operating speed of up to 10 miles per hour; and
  - (B) does not contain reflectors.

Amend lines 24-26, as follows:

<u>Recreational use means riding an electric low speed scooter by a child authorized to ride</u> for leisure, play, or instruction.

3. Does the Bill establish criminal penalties for a minor who fails to wear a helmet while operating an e-scooter?

OLO suggested that the Bill be amended to decriminalize the offense of failing to wear a helmet to reduce racial inequities in law enforcement. The Bill establishes fines for a minor or a parent of a minor who fails to wear a helmet while operating an e-scooter but does not establish this as a criminal penalty. Code § 31-51 requires the Council to set fines for violations of Chapter 31 by resolution. The Council resolution could clarify that the fine is a civil fine and not a criminal offense. The enforcement provisions for the e-scooter helmet requirement in Bill 36-21 are copied from the County's current enforcement provision for wearing a helmet while riding a bicycle in Code § 7-5. The Committee may want to clarify that the penalty for failing to wear a helmet is a Class C civil violation that has a maximum penalty of \$50. This could be done with the following amendment:

Add the following after line 138:

(d) <u>Penalty</u>. The penalty for a violation of the helmet requirements in this law must be a Class C civil violation.

#### 4. What is the fiscal and economic impact of the Bill?

OMB estimated that the Bill would cost \$40,000 each year to hire a contractor to administer and monitor the e-scooter program (©11). OMB also states that the registration fee for rental companies could be set to cover this cost. OLO anticipated that the Bill would have an insignificant impact on the economic conditions in the County.

## COUNTY COUNCIL FOR MONTGOMERY COUNTY, MARYLAND

Lead Sponsor: Councilmember Katz Co-Sponsor: Councilmember Albornoz

#### AN ACT to:

- (1) permit a person to register an electric low speed scooter owned by a County resident for personal use;
- (2) require the registration of an electric low speed scooter fleet offered for rent in the County and pay a registration fee;
- (3) establish operating and parking requirements for electric low speed scooter use in the County; and
- (4) generally amend County law governing electric low speed scooter use in the County.

#### By adding

Montgomery County Code Chapter 31, Motor Vehicles and Traffic Article IX, E-Scooters Sections 31-70, 31-71, 31-72, 31-73, 31-74, 31-75, 31-76, and 31-77

Heading or defined term.

Added to existing law by original bill.

Deleted from existing law or original bill.

Deleted from existing law or the bill by amendment.

Existing law unaffected by bill.

The County Council for Montgomery County, Maryland approves the following Act:

1	Sec.	1. Article IX (Sections 31-70, 31-71, 31-72, 31-73, 31-74, 31-75, 31-76,
2	and 31-77)	of Chapter 31 is added as follows:
3		Article IX. E-Scooters.
4	<u>31-70.</u> <u>Defi</u>	nitions.
5	<u>In thi</u>	is Article, the following words have the meanings indicated:
6	<u>Elect</u>	ric low speed scooter or E-scooter means a vehicle that:
7	<u>(1)</u>	is designed to transport only the operator;
8	<u>(2)</u>	weighs less than 100 pounds;
9	<u>(3)</u>	has single wheels in tandem or a combination of 1 or 2 wheels at the front
10		and rear of the vehicle;
11	<u>(4)</u>	is equipped with handlebars and a seat or a platform designed to be stood
12		on while riding;
13	<u>(5)</u>	is solely powered by an electric motor and human power; and
14	<u>(6)</u>	is capable of operating at a speed of up to 20 miles per hour.
15	<u>Elect</u>	ric low speed scooter does not include:
16	<u>(1)</u>	an electric personal assistive mobility device; or
17	<u>(2)</u>	an electric wheelchair or other mobility aid used by a disabled individual.
18	<u>Pede</u> ,	strian zone means the portion of the sidewalk corridor where pedestrians
19	walk	<u>.</u>
20	<u>Perso</u>	onal use means riding an electric low speed scooter by the owner or any
21	other	person who the owner authorizes to ride the electric low speed scooter
22	witho	out charging rent.
23	31-71. Helr	mets required.
24	<u>(a)</u>	A person who is under age 18 must wear a helmet when riding an e-
25		scooter on a public street, right-of-way, or bicycle path in the County.

26	<u>(b)</u>	The helmet must be approved by the Snell Memorial Foundation or the
27		American National Standards Institute, or other institution that the
28		<u>Director of Transportation determines meets an equivalent standard.</u>
29	31-72. Regi	<u>stration of e-scooters for personal use.</u>
30	<u>(a)</u>	Any County resident who owns an e-scooter for personal use in the
31		County may voluntarily:
32		(1) register the e-scooter with the Montgomery County Police
33		Department by:
34		(A) completing a form provided by the County Executive or
35		designee; and
36		(B) paying a registration fee, if any;
37		(2) <u>have a legible County registration decal on the e-scooter; and</u>
38		(3) remove the County registration decal when the e-scooter is sold,
39		transferred, or dismantled.
40	<u>(b)</u>	E-scooter registration under this Section is not transferable.
41	<u>(c)</u>	A person, other than the owner, must not remove a County registration
42		decal from an e-scooter.
43	<u>(d)</u>	The County Executive may set e-scooter registration fees by Method (3)
44		Regulation.
45	31-73. Regi	stration of e-scooter fleets.
46	<u>(a)</u>	The owner of 2 or more e-scooters for rent in the County must register
47		the e-scooter fleet with the Department of Transportation by:
48		(1) completing a form provided by the County Executive or the
49		Executive's designee; and
50		(2) paying a registration fee.
51	<u>(b)</u>	The owner of an e-scooter fleet operating in the County must ensure that
52		each e-scooter has the following information visible:

**-** 3 –

53		<u>(1)</u>	e-sco	oter company name;
54		<u>(2)</u>	<u>uniq</u> ı	ue identifier for each e-scooter; and
55		<u>(3)</u>	conta	act information for the e-scooter company.
56	<u>(c)</u>	E-sco	ooter re	egistration under this Section is not transferable.
57	<u>(d)</u>	<u>The</u>	Execu	tive may set e-scooter registration fees by Method (3)
58		Regu	lation	or through a memorandum of understanding between the
59		Depa	ırtment	of Transportation and the owner of an e-scooter fleet.
60	31-74. E-sc	<u>ooter</u>	<u>operat</u>	ion and parking requirements.
61	<u>(a)</u>	<u>Mini</u>	<u>mum</u> a	age. A person under the age of 14 must not operate an e-
62		scoot	ter.	
63	<u>(b)</u>	<u>Maxi</u>	imum s	speed. A person must not operate an e-scooter at a speed
64		great	er than	15 miles per hour.
65	<u>(c)</u>	<u>Refle</u>	ectors <u>r</u>	<u>required.</u>
66		<u>(1)</u>	Ever	y e-scooter operating in the County must have:
67			<u>(A)</u>	a lamp on the front that emits a white light visible from at
68				least 500 feet to the front; and
69			<u>(B)</u>	a red reflector on the rear visible from all distances from 600
70				feet to 100 feet to the rear when directly in front of lawful
71				upper beams of head lamps on a motor vehicle.
72		<u>(2)</u>	In ad	ldition to, or instead of, the reflector required in subsection
73			(c)(1)	)(B), an e-scooter may have a functioning lamp that acts as a
74			reflec	ctor and emits a red light or a flashing amber light visible from
75			at lea	ast 500 feet to the rear.
76	<u>(d)</u>	<u>Park</u>	ing <u>req</u>	quirements.
77		<u>(1)</u>	An e	-scooter must be parked in a standing upright position.
78		<u>(2)</u>	Unle	ss otherwise prohibited by law that specifically prohibits
79			parki	ng on a sidewalk, a person may park an e-scooter:

80		<u>(A)</u>	in the street buffer zone, which is located between the
81			sidewalk and curb;
82		<u>(B)</u>	in the frontage zone, which is located between the sidewalk
83			and right-of-way line;
84		<u>(C)</u>	in the curbside zone, which is located on-street, if:
85			(i) corrals or demarcated spaces are available; or
86			(ii) if there is no sidewalk or street buffer zone
87		<u>(D)</u>	on a residential street that permits on-street parking; and
88		<u>(E)</u>	in a designated location as determined by the Director of the
89			Department of Transportation.
90	<u>(3)</u>	A per	rson must not park an e-scooter:
91		<u>(A)</u>	on a sidewalk that is 5 feet in width or narrower;
92		<u>(B)</u>	in a driveway without the permission of the owner of the
93			driveway;
94		<u>(C)</u>	in an area reserved for sidewalk dining;
95		<u>(D)</u>	in a transit zone, including bus stops, shelters, and
96			passenger-waiting areas, except at designated areas within a
97			transit zone, as determined by the Director;
98		<u>(E)</u>	in a loading zone;
99		<u>(F)</u>	in a parking zone dedicated to accessible parking;
100		<u>(G)</u>	in a bicycle lane;
101		<u>(H)</u>	in a manner that impedes access to a doorway, gate, or other
102			entrance or exit;
103		<u>(I)</u>	in a manner that reduces the pedestrian zone to less than 4
104			feet or that otherwise prohibits the free flow of pedestrian
105			traffic; or

106			<u>(J)</u>	in a man	<u>ner that ir</u>	<u>iterf</u>	eres with	place	es of	access for pe	<u>ersons</u>
107				with dis	<u>sabilities</u>	<u>as</u>	required	<u>by</u>	<u>the</u>	Americans	with
108				<u>Disabilit</u>	ties Act.

148	(d) diminish	recovery for damages arising out of the ownership,
149	<u>maintenanc</u>	ce, or operation of a motor vehicle.

#### LEGISLATIVE REQUEST REPORT

Bill 36-21

*Motor Vehicles and Traffic – E-Scooters – Operation Requirements and Registration* 

**DESCRIPTION:** Bill 36-21 would permit a person to register an electric low speed

scooter (e-scooter) owned by a County resident for personal use. The owner of 2 or more e-scooters would be required to register and pay a fee for an e-scooter fleet offered for rent in the County. The Bill would also establish operating and parking requirements for e-scooter use in

the County.

**PROBLEM:** E-scooters are a growing transportation method, but there few laws or

regulations regarding their operation.

GOALS AND To p

**OBJECTIVES:** 

To provide operating expectations for e-scooters

**COORDINATION:** Transportation

**FISCAL IMPACT:** Office of Management and Budget.

**ECONOMIC** 

IMPACT:

Office of Legislative Oversight

**RESJ STATEMENT:** Office of Legislative Oversight

**EVALUATION:** To be researched.

**EXPERIENCE** 

To be researched.

**ELSEWHERE:** 

SOURCE OF INFORMATION:

Ludeen McCartney-Green, Legislative Attorney

APPLICATION

WITHIN

**MUNICIPALITIES:** 

There are currently three participating municipalities (Gaithersburg,

Rockville, and Takoma Park).

**PENALTIES:** A violation of Chapter 31 is a Class B violation.

Marc Elrich County Executive

#### OFFICE OF THE COUNTY ATTORNEY

Marc P. Hansen County Attorney

#### **MEMORANDUM**

October 29, 2021

TO: Chris Conklin, Director

Department of Transportation

Neal Anker Neal Anker FROM:

**Associate County Attorney** 

VIA: Edward Lattner, Chief

Division of Governmental Operations

Office of County Attorney

Bill 36-21, Motor Vehicles and Traffic - E-Scooters - Operation Requirements RE:

and Registration

Bill 36-20 would permit a person to register an electric low speed scooter (e-scooter) owned by a County resident for personal use; would require the owner of two (2) or more escooters (an e-scooter fleet) to register and pay a fee for an e-scooter fleet for rent in the County; and would establish operating and parking requirements for e-scooter use in the County.

The Bill is legally valid. Although the Maryland Vehicle Law<sup>1</sup> expressly preempts local regulation on any subject with which the Maryland Vehicle Law deals, Transp. § 25-101.1, the provisions of Bill 36-21 fall within one of the statutory exceptions to preemption.

The Maryland Vehicle Law broadly provides that no local authority or political subdivision of the state may "make or enforce any local law, ordinance or regulation on any subject covered by the Maryland Vehicle Law." Transp. Art., § 25-101.1(b)(3). The same statute also provides that "[t]he provisions of the Maryland Vehicle Law prevail over all local legislation and regulation on any subject with which the Maryland Vehicle Law deals" and "[a]ll public local laws, ordinances, and regulations that are inconsistent or identical with or equivalent to any provision in the Maryland Vehicle Law are repealed." Transp. Art., § 25-101.1(c)(1) & (2).

<sup>&</sup>lt;sup>1</sup> The Maryland Vehicle Law is found in Titles 11 through 27 of the Transportation Article, Md. Code Ann., Transp. § 11-206.

Chris Conklin October 29, 2021 Page 2

But Bill 36-21 falls within one of the many exceptions where the Maryland Vehicle Law permits local regulation. Transp. § 25-102(a) states that the Maryland Vehicle Law "do[es] not prevent a local authority, in the reasonable exercise of its police power, from exercising [certain enumerated] powers as to highways under its jurisdiction. One of those powers is "regulating the operation of bicycles, requiring them to be registered, and imposing a registration fee." Transp. § 25-102(a)(8). The Maryland Vehicle Law includes and Electric Low Speed Scooter within its definition of the term Bicycle², the County is empowered to regulate the operation and registration of Electric Low Speed Scooters as to the highways under its jurisdiction. As a result, the Bill is not preempted by state law.

Bill 36-21 is similar to Bill 8-20, Bicycles and E-Scooters - Operating Requirements and Registration that was introduced on March 3, 2020 and recommended for approval by a joint Public Safety and Transportation and Environment Committee, with amendments, on June 25, 2020, but which was never considered by the full Council before expiring last month due to the global COVID-19 pandemic. Bill 36-21 includes the amendment approved by the joint committee in June 2020.

One note: it appears there may be a typo on line 70 (should this read as "**60** feet to 100 feet"?). I have no other editing suggestions or concerns regarding this Bill. All the editing suggestions and concerns that I raised in my memorandum regarding Bill 36-20, dated March 16, 2020, and which were applicable to e-scooters, have been incorporated into this Bill.

If you have any questions or concerns regarding this memorandum, please call me at (240) 777-4240.

# Fiscal Impact Statement Council Bill 36-21, Motor Vehicles and Traffic – E-Scooter Operation Requirements and Registration

#### 1. Legislative Summary.

The attached Bill 36-21 serves to propose legislation related to the operation requirements and registration of e-scooters. The Bill will permit the registration of an electric low speed scooter owned by a County resident for personal use. The owner of two or more e-scooters for rent in the County must register the e-scooter fleet with the Department of Transportation (DOT). The Bill also includes operating requirements and an enforcement clause. The operating requirements include an operator age of at least 14 years of age, a speed requirement not to exceed 15 miles per hour, reflector, and parking requirements. The enforcement clause details fine and impoundment conditions.

Bill 36-21 is similar to Bill 8-20, Bicycles and E-Scooters – Operating Requirements and Registration – introduced on March 2, 2020. Bill 8-20 was never considered by the full Council before expiring in September. The current Bill 36-21 includes all amendments approved by the joint Committee last June.

# 2. An estimate of changes in County revenues and expenditures regardless of whether the revenues or expenditures are assumed in the recommended or approved budget. Includes source of information, assumptions, and methodologies used.

The change in operating expenditures is estimated to be \$40,000 per year, \$240,000 over a six-year period. This expenditure represents the DOT's estimate to support hiring a contractor to administer and monitor the e-scooter program. The contractor will be tasked with mapping the location and use of e-scooters. This cost is based on a current contract with a consultant performing these duties.

The County Executive may establish e-scooter registration fees at an amount which is sufficient to pay the costs of administering e-scooter services by Method 3 Regulation or through a Memorandum of Understanding (MOU) between DOT and the owner of an e-scooter fleet.

While the e-scooter program is privately owned and operated, there has been a growing safety concern related to improper parking of e-scooters and bikes. To address parking hazards, it is recognized that additional corrals and bike racks maybe a solution; however, the associated costs have not yet been identified.

#### 3. Revenue and expenditure estimates covering at least the next 6 fiscal years.

At \$40,000 per year, the cost will be \$240,000 over the next 6 fiscal years. The registration fee should be set at a level to cover the costs to implement Bill 36-21. Additional revenue may support additional parking infrastructure.

Estimated Operating Costs	FY23	FY24	FY25	FY26	FY27	FY28	6 Year Total
Contractor	40,000	40,000	40,000	40,000	40,000	40,000	240,000

### 4. An actuarial analysis through the entire amortization period for each bill that would affect retiree pension or group insurance costs.

Not applicable.

### 5. An estimate of expenditures related to County's information technology (IT) systems, including Enterprise Resource Planning (ERP) systems.

Not applicable.

### 6. Later actions that may affect future revenue and expenditures if the bill authorizes future spending.

This bill does not authorize future spending.

#### 7. An estimate of the staff time needed to implement the bill.

It is expected that staff time will be necessary to process rental e-scooter registrations. The specific amount of time will depend on the number of registrations, but the total time is expected to be minimal.

### 8. An explanation of how the addition of new staff responsibilities would affect other duties.

Staff time to process rental e-scooter registrations is expected to be low, thus a minimal impact on other staff duties. There may also be additional time needed to track, respond to complaints, and monitor compliance.

#### 9. An estimate of costs when an additional appropriation is needed.

It is expected that \$40,000 will be required to support the cost of the consultant to map the location and the use of the e-scooters provided for rent in the County.

#### 10. A description of any variable that could affect revenue and cost estimates.

The consultant costs are fixed; an increase in the number of e-scooters operating in the County will not require an additional expense. DOT's staff time may increase should complaints increase.

Also, the e-scooter program is privately owned and operated without public funding. DOT regulates advertisements on the vehicles; there is no provision for any advertising revenue sharing program.

Currently, the County has four private companies authorized to operate e-scooters and e-bike rental operations in the County. Should additional e-scooter companies wish to operate in the County, resources may be required to execute the MOU, as well as, to monitor their performance and adherence.

11. Ranges of revenue or expenditures that are uncertain or difficult to project
--

Not applicable.

#### 12. If a bill is likely to have no fiscal impact, why that is the case.

Any additional costs incurred by the County are expected to be covered by the registration fee.

#### 13. Other fiscal impacts or comments.

Not applicable.

#### 14. The following contributed to and concurred with this analysis:

Gary Erenrich, Department of Transportation Brady Goldsmith, Department of Transportation Felicia Hyatt, Office of Management and Budget

# Racial Equity and Social Justice (RESJ) Impact Statement

Office of Legislative Oversight

BILL 36-21: MOTOR VEHICLES AND TRAFFIC—E-SCOOTERS—
OPERATION REQUIREMENTS AND REGISTRATION

#### **SUMMARY**

The Office of Legislative Oversight (OLO) anticipates that Bill 36-21 could widen racial and social inequities in the County by widening inequities in transit options and law enforcement and potentially widening inequities in traffic injuries. To improve racial equity and social justice, this statement offers several recommended amendments for consideration.

#### PURPOSE OF RESJ IMPACT STATEMENT

The purpose of RESJ impact statements is to evaluate the anticipated impact of legislation on racial equity and social justice in the County. Racial equity and social justice refer to a **process** that focuses on centering the needs of communities of color and low-income communities with a **goal** of eliminating racial and social inequities.<sup>1</sup> Achieving racial equity and social justice usually requires seeing, thinking, and working differently to address the racial and social harms that have caused racial and social inequities.<sup>2</sup>

#### PURPOSE OF BILL 36-21

Across the nation, emergency room visits involving electronic scooters (e-scooters) have increased three-fold, from 7,700 to 25,400, between 2017 and 2020.<sup>3</sup> The goal of Bill 36-21 is to improve the safety of e-scooters operating in the County to reduce such injuries.<sup>4</sup> If implemented, the Bill would require the registration of e-scooters for rent, the use of helmets for minors using e-scooters in public, the use of reflectors on e-scooters, limiting use to persons 14 years of age or above, and parking of e-scooters upright that avoids interfering with access to sidewalks and other spaces that comply with the Americans with Disabilities Act. Bill 36-21 also defines that e-scooters will be regulated and authorizes the Montgomery County Police Department to enforce the bill's helmet and rental fleet registration requirements. Further, the bill sets a maximum speed of 15 miles per hour for e-scooters used in the County.

Several of Bill 36-21's provisions align with best practices for the public management of e- scooters.<sup>5</sup> Bill 36-21's provisions are also consistent with County law (Bill 2-20) regulating bicycle and helmet use in the County.<sup>6</sup> Bill 36-21 is similar to Bill 8-20, Bicycles and E-Scooters - Operating Requirements and Registration, which was introduced on March 3, 2020 and recommended for approval with amendments by the joint Public Safety and Transportation and Environment Committee. Introduced on October 19, 2021, Bill 36-21 includes amendments approved by the joint Committee in June 2020.

#### TRANSIT OPTIONS, SAFETY, AND RACIAL EQUITY

As part of a broader framework of shared mobility options that include ride and bicycle share programs, e-scooter share programs are changing the transportation landscape. A major concern is whether shared mobility options, including e-scooter share programs, will equitably benefit people and communities of color, or will they "perpetuate and exacerbate transportation inequities." To consider this concern, this section describes the historical drivers of racial inequities in transit and available data on transit, banking, and public safety disparities that could be impacted by Bill 36-21.

(14)

Bill 36-21

Inequities in Transit.<sup>8</sup> A history of inequitable planning and policy has shaped today's transportation landscape. This includes federal, state, and local policies that enabled the rise of automotive ownership and the mass construction of the federally funded interstate highway system in the 1950's. The federal government also subsidized the creation of White-only suburbs that allowed White householders to drive to jobs in the city and build wealth while discrimination in lending and employment restricted housing choices and wealth building for Black residents and other people of color. As highway construction and urban renewal efforts destroyed and displaced many Black neighborhoods, increasing isolation, crowding, and clustering of communities of color, funding and support for public transit waned making it more difficult for residents of color to connect to jobs, education, healthy food options and more.

The gentrification and influx of high-income residents back into many city centers has further pushed many low-income residents into car-dependent suburbs since the early 2000's, but many of these residents lack vehicles. Racial discrimination in automotive financing and the insurance industry where Black customers and communities are charged higher rates than their White peers exacerbates this trend. As such, residential patterns defined by structural racism persist today with the racial wealth gap enabling White residents to more housing and transportation choices, while BIPOC residents experience far fewer options. Of note, the spatial mismatch for low-wage workers is most prevalent in the suburbs where a lack of public transit hinders transit dependent workers' ability to commute.

Historically inequitable policies combined with current inequities in housing and transit manifest as disparities by race and ethnicity on several measures of transportation access. At the national level:

- Black households were the least likely to have access to an automobile (20 percent);<sup>9</sup>
- Black riders were twice as likely as their population share to rely on public transit (24 percent vs. 12 percent);and<sup>10</sup>
- Black riders also had the longest average public transit time.<sup>11</sup>

Local data on vehicle access, reliance on public transit, and commute time mirrors these trends with Black residents experiencing the worst transportation options compared to others. More specifically, in Montgomery County:

- Black households (13.8 percent) were the least likely to have access to an automobile followed by Latinx households (8.4 percent), Asian households (5.4 percent), and White households (5.3 percent);<sup>12</sup>
- Black residents (20.7 percent) were the most likely to commute to work by on public transit compared to Asian residents (14.3 percent), White residents (13.4 percent), and Latinx residents (11.3 percent);<sup>13</sup> and
- Black residents also experienced the longest commutes (38 minutes) compared to Asian residents (36 minutes), and White and Latinx residents (34 minutes).<sup>14</sup>

These trends suggest that Black households could especially benefit from access to shared mobile options such as escooters that address their greater need for additional transportation options. Available data, however, suggests that many of the households with the greatest transit needs may not be able to access the e-scooter rental options that rely on credit cards connected to e-scooter rental apps. Nationally, among Black households:

- 17 percent are unbanked, meaning that no one has a checking or savings account; 15
- 30 percent are under-banked, meaning they have an account but also use alternative and often exploitive financial services such as check cashing or payday loans; and 16
- 25 percent do not have a smartphone, which hinders the ability to access app-based shared mobility options.

Bill 36-21

**Inequities in Traffic Injuries.** Historically inequitable policies and current inequities have also fostered traffic-related injuries by race and ethnicity. Researchers note that unsafe street infrastructure, such as inadequate sidewalks, lighting, signage, and crosswalks, contribute to traffic accidents and injuries often characterize historically under-invested communities of color.<sup>18</sup> Racial and ethnic differences in the social determinants of health have also been cited as drivers of racial inequities in traffic-related injuries.<sup>19</sup> National data on traffic injury inequities show that:

- Among traffic deaths, Indigenous and African Americans evidence the highest death rates at 145.6 and 68.5 per 100,000 followed by White (55.2 per 100,000), Latinx (46.9 per 100,000) and Asian (15.3 per 100,000) persons.<sup>20</sup>
- Among bicyclists, Latinx riders demonstrated the highest accident fatality rates, accounting for 38 percent of bicycle fatalities compared to 16 percent of the population in 2010.<sup>21</sup>
- For motorcycle crashes, Black victims were 1.5 times more likely to die from their injuries than similarly injured White victims even though Black motorcyclists were 30 percent more likely to have been wearing helmets.<sup>22</sup>
- Among bicyclists and pedestrians, Black people accounted for 18 percent of traffic-related deaths compared to 12 percent of the overall population.<sup>23</sup>

Available local data also demonstrates disparities in traffic safety by race and ethnicity with:

- Latinx pedestrians being the most likely to be killed in a traffic incident (2.9 per 100,000) followed by Black pedestrians (1.6 per 100,000) and White pedestrians (0.9 per 100,000). Yet, among vehicle occupants, Black residents are the most likely to be killed in Montgomery County (4.3 per 100,000) followed by White residents (3.4 per 100,000) and Latino residents (3.2 per 100,000).<sup>24</sup>
- Local communities in Montgomery County with higher rates of poverty, persons of color, and younger residents also evidence higher collision rates than higher-income, White, and older communities.<sup>25</sup>

**Inequities in Law Enforcement.** Historically inequitable policies and current inequities have also fostered law enforcement interactions with the public by race and ethnicity. Both over-policing in communities of color and racial bias in police interactions with the public has been identified as drivers of racial inequities in law enforcement driven in part by the "War on Drugs." Inequities in law enforcement often begin with disparate decisions about who police officers pull over, ticket, and search during routine stops of motorists, bicyclists, and pedestrians. For example, a large-scale analysis of racial disparities in police stops across the U.S. found that:<sup>26</sup>

- Black drivers are 20 percent more likely to be stopped by police than White drivers on average. More specifically, the annual per capita traffic stop rate by local police offers was 0.20 for Black drivers compared to 0.14 for White drivers and 0.09 for Latinx drivers; and the per capita traffic stop rate by state patrol officers was 0.10 for Black drivers compared to 0.07 for White drivers and 0.05 for Latinx drivers.
- Black drivers are also twice as likely to be searched during traffic stops than White drivers, yet they are less likely to have contraband. Disproportionate shares of people shot and killed at traffic stops are also Black.
- Black driver stop rates diminished under the "veil of darkness," suggesting that discrimination (e.g. racial profiling) rather than differences in driver behavior account for disparities in traffic stops and searches.

Of relevance to potential e-scooter police stops, available data from other jurisdictions demonstrate racial disparities in police stops of bicyclists. For example:

Bill 36-21

- In Seattle, Black cyclists received helmet infractions nearly four times higher than White cyclists, and Indigenous cyclists' was more than two times higher than White riders. In 2019, Black people accounted for 4.7 percent of cyclists however accounted for 17.3 percent of bicycle helmet infractions from 2003 to 2020; Native Americans accounted 0.5 percent of riders and 1.1 percent of bicycle helmet infractions.<sup>27</sup>
- In Washington, DC, available data from 2010 to 2017 indicates that Black cyclists accounted for 88 percent of stops, a rate nearly twice the Black population. Black cyclists younger than 18 were stopped more than twice as often as White cyclists of all ages.<sup>28</sup>
- In Oakland, Black cyclists accounted for nearly 3 in 5 police stops, being stopped three times as often as White riders, despite accounting for less than a quarter of the population. Of those stopped between 2016 and 2019, 59.4 percent were Black, 18.2 percent were White, 15.2 percent were Latinx, and 4.3 percent were Asian.<sup>29</sup>

Local data on racial disparities in juvenile justice intakes and traffic stops in Montgomery County suggest that similar disparities in traffic stops among bicyclists and e-scooter riders could also occur. For example:

- Black youth were over-represented in juvenile justice intakes, accounting for 55 percent intakes in 2019 compared to comprising 36 percent of all youth. Conversely, White youth accounted for 13 percent of intakes compared to 20 percent of all youth, and Latinx/Other youth accounted for 32 percent of intakes compared to 44 percent of all youth.<sup>30</sup>
- Black drivers experienced the highest traffic stop rates. In 2019, 27.4 percent of Black adults were stopped compared to 13.5 percent of White adults, 17.4 percent of Latinx adults, 11.6 percent of Native American adults, and 7.2 percent of Asian adults.<sup>31</sup>
- Black drivers received the highest rate of traffic violations. In 2019, there were 321 violations issued per 1,000 Black drivers compared to 310 violations issued per 1,000 Other Race drivers; 215 violations issued per 1,000 Latinx drivers; 132 violations issued per 1,000 White drivers; 126 violations issued per 1,000 Native American drivers; and 70 violations issued per 1,000 Asian drivers.
- Black and Latinx drivers were more than twice as likely as White drivers to be searched during traffic stops. In 2019, 3.8 percent of Black drivers were searched compared to 3.4 percent of Latinx drivers, 1.6 percent of White drivers, 1.4 percent of Asian drivers and 1.0 percent of Asian drivers.<sup>33</sup>

#### **ANTICIPATED RESJ IMPACTS**

Discerning the potential impact of Bill 36-21 on racial equity and social justice in Montgomery County requires considering the potential impact of the bill on three sets of racial disparities: inequities in transit options, traffic-related injuries, and law enforcement. The potential impact of Bill 36-21 on each of these is addressed in turn. Taken together, OLO finds that Bill 36-21 as currently constructed could widen racial and social inequities in transit options and law enforcement and potentially widen racial inequities in traffic-related injuries.

• Transit options. E-scooter rentals as a shared mobility service could be implemented to narrow racial and income disparities in transportation access. Bill 36-21, however, is unlikely to improve transportation opportunities for households reliant on public transportation because available research suggests that White, affluent, and male riders are the primary beneficiaries of e-scooter share programs.<sup>34</sup> As such, the Bill as currently constructed is unlikely to diminish transit inequities by race, ethnicity or income across the County.

Bill 36-21

- Traffic injuries. An e-scooter rental program could be implemented to narrow racial disparities in traffic accidents and injuries. As currently constructed, Bill 36-21 might not reduce racial disparities in traffic injuries since its primary injury reduction provision requiring minors to wear helmets when riding e-scooters could widen disparities in helmet use by race and ethnicity. For example, a 2016 research report evaluating bicycle helmet laws found that while helmet laws increased helmet usage for every racial group, they increased use more for White students than for students of color thus widening the helmet use gap by race.<sup>35</sup> Another study found that helmet use among motorcyclists offered less protection against injury among Black riders compared to White riders.<sup>36</sup> While Bill 36-21 could yield public health gains by increasing helmet use overall, it could also sustain or exacerbate racial inequities in helmet use and injuries.
- Law enforcement. An e-scooter rental program could be implemented to narrow racial disparities in law enforcement. Analogous to Bill 2-20, Bill 36-20 specifies the fine for a person's helmet violation must be waived if a minor or their parent can produce proof they have obtained a helmet. Any fines for not wearing a helmet, however, could exacerbate racial inequities in law enforcement by increasing citations among youth of color that further burden communities of color. Further, current disparities by race and ethnicity in juvenile justice intakes, traffic stops and violations locally suggest a high likelihood that inequities by race and ethnicity in enforcing the helmet requirement may also occur. Enforcement of this provision of Bill 36-21 could likely widen racial inequities in law enforcement.

#### **RECOMMENDED AMENDMENTS**

The County's Racial Equity and Social Justice Act requires OLO to consider whether recommended amendments to bills aimed at narrowing racial and social inequities are warranted in developing RESJ impact statements.<sup>37</sup> OLO finds that Bill 36-21 as currently constructed could widen racial and social inequities in transit options and law enforcement and potentially widen racial inequities in traffic-related injuries. Should the Council seek to address these inequities with recommended amendments to Bill 36-21, the following promising practices for advancing racial equity in transit options, reduced traffic injuries and law enforcement can be considered.

Expand inclusive transit options. Promising practices for using e-scooter programs, policies, and practices to improve transportation opportunities for households reliant on public transportation include:

- Ensuring equitable access to e-scooters by setting targets for e-scooter distribution and/or availability at the neighborhood level and adjust the target as needed to address the mobility needs of each neighborhood,<sup>38</sup>
- Integrating shared mobility services with public transportation,<sup>39</sup>
- Integrating public transit payment methods with shared mobility services,<sup>40</sup>
- Requiring shared mobility services to offer lower cost options for low-income users and publicize available discount programs,<sup>41</sup>
- Requiring shared mobility services to provide cash and non-smart phone booking options,<sup>42</sup>
- Requiring multi-lingual customer service, website, signage, outreach and apps.<sup>43</sup>

*Reduce traffic injury inequities.* Promising practices for enabling e-scooter programming to reduce racial inequities in traffic accidents and injuries include:

- Requiring e-scooter providers to engage in information provision, education, and outreach activities that encourage e-scooter riders to wear helmets, especially BIPOC residents, and reframe helmet norms,<sup>44</sup>
- Providing opportunities for new e-scooter users to gain riding experience,<sup>45</sup>

Bill 36-21

- Distributing helmets for e-scooter riders,<sup>46</sup>
- Improving infrastructure for vulnerable road users (bicyclists and e-scooter riders) especially in BIPOC communities and low-income communities,<sup>47</sup>
- Allowing e-scooters to operate in bike lanes or paths, but not on sidewalks,<sup>48</sup>
- Requiring signage where e-scooter travel, speed, or parking is restricted,<sup>49</sup>
- Recommending helmet use to reduce head injuries for all riders,<sup>50</sup>
- Recommending limiting use to one rider per unit.<sup>51</sup>

Reduce law enforcement inequities. Promising practices for ensuring that e-scooter programs, policies, and practices do not exacerbate racial inequities in law enforcement include:

- Removing provisions that criminalize minors and their parents for teens not wearing helmets,
- Investing in public education campaigns that encourage e-scooter riders of all ages to wear helmets,<sup>52</sup>
- Encouraging law enforcement to provide helmets for riders to encourage helmet use, 53
- Establishing data reporting requirements for e-scooter providers that allow the County to monitor their compliance with County requirements and to access the impacts of e-scooters on safety and equity concerns,<sup>54</sup>
- Establishing data reporting requirements for e-scooter providers to share collision data with the County.<sup>55</sup>

#### **CAVEATS**

Two caveats to this racial equity and social justice impact statement should be noted. First, predicting the impact of legislation on racial equity and social justice is a challenging, analytical endeavor due to data limitations, uncertainty, and other factors. Second, this RESJ impact statement is intended to inform the legislative process rather than determine whether the Council should enact legislation. Thus, any conclusion made in this statement does not represent OLO's endorsement of, or objection to, the bill under consideration.

#### CONTRIBUTIONS

OLO staffer Dr. Elaine Bonner-Tompkins, Senior Legislative Analyst, drafted this RESJ impact statement with assistance from Dr. Theo Holt, RESJ Performance Management and Data Analyst.

Office of Legislative Oversight

#### Bill 36-21

# Motor Vehicles and Traffic – E-Scooters – Operation Requirements and Registration

#### **SUMMARY**

The Office of Legislative Oversight (OLO) anticipates that enacting Bill 36-21 would have an insignificant impact on economic conditions in the County. Enacting the Bill would likely increase costs for certain electric low speed scooter companies and riders, as well as revenues for certain County-based businesses. However, OLO expects the increases in costs and revenues to be negligible on a per business and rider basis.

#### **BACKGROUND**

Electric low speed scooters (hereinafter "e-scooters") are an integral part of the County's growing shared micro-mobility network. Yet, there are few laws and regulations regarding the registration, safety/operation, and parking of e-scooters. The goals of Bill 36-21 are to fill these regulatory gaps and reduce injuries associated with the use of e-scooters. If enacted, the Bill would make the following changes to County law:

- **Registration:** Require owners of 2 or more e-scooters for rent to register their e-scooter fleet with the Department of Transportation and pay a registration fee to be set by the County Executive; permit any County resident who owns an e-scooter for personal use to register it with the Montgomery County Police Department; and allow the County Executive to set a registration fee.
- Safety/Operation: Require a person under the age of 18 to wear a helmet when riding an e-scooter and require every e-scooter to have reflectors.
- Parking: Establish various parking requirements for e-scooter use.

#### INFORMATION SOURCES, METHODOLOGIES, AND ASSUMPTIONS

If the Council enacts Bill 36-21, the changes to the registration and safety/operation regulations for e-scooter use in the County would have economic impacts on certain residents and private organizations operating in the County. However,

<sup>&</sup>lt;sup>1</sup> Montgomery County Council, <u>Bill 36-21, Motor Vehicles and Traffic – E-Scooters – Operation Requirements and Registration</u>, Introduced on October 19, 2021.

Office of Legislative Oversight

OLO believes these impacts would be negligible for affected residents and private organization based on the following assumptions:

- Registration Fee Assumption: The County Executive would set the fees by Method (3), meaning they would not be subject to County Council approval or disapproval.<sup>2</sup> Given the importance of micro-mobility to the County's climate goals,<sup>3</sup> OLO assumes the fees would be set at levels too low to significantly affect conditions in the local e-scooter market (prices, supply, demand, etc.).
- Helmet Requirement Assumption: OLO assumes the total number of helmets that would be purchased in County-based businesses on an annual basis because of the e-scooter helmet requirement for persons under the age of 18 would not significantly affect household expenses or business revenue. This assumption is informed by the price range of helmets,<sup>4</sup> survey data suggesting that most e-scooter riders subject to the helmet requirement likely would already possess a helmet,<sup>5</sup> and the likelihood of residents purchasing helmets from vendors based outside the County.
- Reflector Requirement Assumption: The reflector requirement likely would increase operating expenses for escooter companies and household expenses for escooter riders, assuming companies pass on some portion of the additional cost. However, based on the potential price of purchasing, installing, and replacing reflectors, the number of daily riders of escooters, and the likelihood of residents purchasing reflectors from vendors based outside the County, OLO assumes the requirement's impacts would be on operating expenses on rider income would be negligible.

Note: While the helmet and reflector requirements may reduce e-scooter injuries, the Bill's potential impacts on medical costs for residents is excluded from the scope of this analysis. Also excluded from the analysis is any positive externality that businesses may receive from regulating e-scooter parking.

<sup>&</sup>lt;sup>2</sup> Montgomery County Code, <u>Sec. 2A-15</u>. <u>Procedure for adoption of regulations</u>.

<sup>&</sup>lt;sup>3</sup> Montgomery County, Climate Action Plan, June 2021.

<sup>&</sup>lt;sup>4</sup> Most helmet prices reportedly range from \$25 to \$200. See Hannah Horvath, "<u>7 best bike helmets for 2021 and how to choose one</u>," NBC News, April 7, 2021.

<sup>&</sup>lt;sup>5</sup> In a nationally representative household survey conducted in 2019, parents reported that 4 out of 5 children ride bikes and 1 out of 5 never wear helmets. See University of Michigan, National Poll on Children's Health, May 20, 2019.

<sup>&</sup>lt;sup>6</sup> A cursory review of prices for e-scooter lights suggest that the per unit cost may be less than \$20. Companies would likely pass on the cost

<sup>&</sup>lt;sup>7</sup> See Toole Design, <u>Montgomery County Dockless Mobility Update</u>, Montgomery County Department of Transportation.

Office of Legislative Oversight

#### **VARIABLES**

The primary variables that would affect the economic impacts of enacting Bill 36-21 are the following:

- total annual e-scooter registration fees
- total annual amount of helmet and reflector purchases at County-based businesses
- total annual cost of reflectors
- percentage of registration, helmet, and reflector costs passed from e-scooter companies to residents

#### **IMPACTS**

WORKFORCE = TAXATION POLICY = PROPERTY VALUES = INCOMES = OPERATING COSTS = PRIVATE SECTOR CAPITAL INVESTMENT = ECONOMIC DEVELOPMENT = COMPETITIVENESS

#### Businesses, Non-Profits, Other Private Organizations

If enacted, Bill 36-21 would have targeted impacts on e-scooter companies operating in the County and certain County-based businesses that sell helmets and reflectors. E-scooter companies would experience a net increase in operating costs due to the registration fee and reflector requirements. However, as previously discussed, OLO anticipates the increase in operating costs would be negligible due to the expected minor costs associated with registration fees and purchasing reflectors and the likelihood of companies passing a portion of the costs onto e-scooter riders.

Moreover, the Bill may result in certain County-based businesses experiencing an increase in helmet and reflector sales because of enacting the Bill. However, as previously discussed, OLO anticipates that the net increase in revenues would have a negligible impact on business incomes due to the price of purchasing, installing and the likelihood of residents purchasing reflectors from vendors based outside the County.

Beyond these effects, OLO does not believe the Bill would impact private organizations based in the County in terms of the Council's other priority indicators.<sup>8</sup>

#### **Residents**

If enacted, Bill 36-21 would have targeted impacts on certain residents who own e-scooters for personal use. Residents who would opt into the voluntary registration fee and/or purchase helmets would experience a net increase in household expenses. However, OLO anticipates the net increase in household expenses would be negligible for individual households due to the price of helmets and expected registration fees and that relatively few households would experience the expenses due to the number of e-scooter riders who already possess a helmet and the voluntary registration provision.

#### **CAVEATS**

Two caveats to the economic analysis performed here should be noted. First, predicting the economic impacts of legislation is a challenging analytical endeavor due to data limitations, the multitude of causes of economic outcomes, economic shocks, uncertainty, and other factors. Second, the analysis performed here is intended to *inform* the legislative process, not determine whether the Council should enact legislation. Thus, any conclusion made in this statement does not represent OLO's endorsement of, or objection to, the Bill under consideration

#### CONTRIBUTIONS

Stephen Roblin (OLO) prepared this report.

# Testimony from Bird Rides, Inc. Bill 36-21, Motor Vehicles and Traffic – E-Scooters – Operation Requirements and Registration

Thank you, Councilmember Katz, Vice President Albornoz, and all Council Members for your leadership and careful consideration of Montgomery County's e-scooter regulations.

Bird is a shared e-scooter company that operates in more than 350 communities around the world and we have had the privilege to operate shared e-scooters in Montgomery County since 2019. We greatly value our partnership with the County, MCDOT, and the other community stakeholders who have helped make the Dockless-Bike and E-Scooter program a success.

#### **Bird in Montgomery County**

With 13,458 riders and 77,230 rides in Montgomery County, Bird scooters have become an important transportation option for residents and visitors. In our third year of operations it is clear that micromobility is safe, sustainable, and grows the economy

- Safe: Bird has a medical incident rate of 0.00201% of rides, or 1 in 50,000 rides, which is comparable to bike injury rates and over two times lower than cars (1 in 20,000).
- **Sustainable:** Montgomery County riders replaced 25,000+ vehicle miles travelled (VMT) and avoided 23,000+ lbs of CO2 emissions.
- **Economic Impact:** Emory University researchers found "\$921 in spending created per e-scooter deployed on average over 6 months" in the local economy.

We are proud to help our riders make this important impact, helping to advance the County's ambitious climate goals to reduce greenhouse gas emissions 80% by 2027 and 100% by 2035. Our years of experience have allowed us to build efficient and orderly operations, responding quickly to community concerns and decreasing complaints. This strong record enabled Bird to expand our service, recently being invited into new communities like Gaithersburg and Germantown.

Scooters have also proven to be a useful mode of transportation when other modes are disrupted. During the COVID-19 pandemic we saw longer trips and new travel patterns as residents took advantage of our naturally socially distant service to make essential trips. We continue to offer free rides for healthcare workers. In response to the recent Metro disruptions

we have adjusted our deployments to serve commuters impacted, helping them reduce congestion from added car trips.

We share your commitment to safety and sustainability and we support the Council's effort to formalize the regulatory framework for e-scooters. Our existing MOU with MCDOT includes many of Bill 36-21's requirements for scooter parking and vehicle specifications. We look forward to building on that foundation in the next phase of the program.

#### **Safety and Community Engagement**

We require riders to be 18 years of age or older and we strongly encourage all riders to wear helmets. Helmets are available free of charge on our website or through our app, and we regularly distribute free helmets in the community. Most recently we held scooter safety training sessions in Wheaton (9/18/21) and Rockville (10/16/21) alongside the Adult Learn to Ride bicycle classes from the Washington Area Bicyclist Association (WABA).

At these events we gave out free helmets and taught attendees how to safely ride and correctly park our scooters. We also made residents aware of our Community Pricing program, which offers a 50% discount to low income riders, Pell grant recipients, select local nonprofit and community organizations, veterans and senior citizens.

While this program began as a pilot, we have seen it mature into an important component of the County's climate and mobility strategies. We look forward to continuing our partnership in the months and years ahead.

Sincerely,
Perry Holmes
Manager, Government Partnerships
Bird Rides, Inc.

##

Testimony on Behalf of the County Executive

Bill 36-21, Motor Vehicles and Traffic – E-Scooters – Operation Requirements and Registration

My name is Hannah Henn, Deputy Director in the Department of Transportation, and I am providing testimony on behalf of County Executive Marc Elrich. Bill 36-21 is an important step toward encouraging safe and responsible use of e-scooters in the County. The County Executive supports the proposed bill and its requirements that aim to protect low speed e-scooter riders and improve safety and accessibility for all people traveling on roads and sidewalks in the County.

When used properly and appropriately managed, micromobility devices such as e-scooters can expand the reach of our overall transit network and reduce the use of automobiles for short and medium length trips. MCDOT has an existing pilot program agreement with private companies for shared use scooters and bikes. The agreement includes requirements for parking, operating hours, and operator age. While this arrangement has generally been effective, improper parking of e-scooters is the dominant concern raised by the public about these vehicles. Proper parking is especially important to minimize potential obstacles for people with disabilities.

The County Executive supports the fact that Bill 36-21 further defines parking requirements that are the responsibility of rental companies and their riders. Additionally, the County Executive supports the inclusion of parking requirements for privately owned vehicles, as individual ownership is growing in popularity. Bill 36-21 should improve enforcement capabilities for existing provisions in agreements with rental fleets while ensuring that the safety and operating requirements also apply to privately-owned e-scooters.

At the County Executive's direction, MCDOT will focus on the working sessions to ensure that the final legislation is as effective as possible in supporting the enforcement of the parking guidelines. Possible solutions may include restructuring the agreement between the County and rental companies to impose fines levied on private companies or renters when scooters are improperly parked.

The Department has several technical comments and clarifications that can be addressed during committee work sessions on this legislation. Thank you for your attention to this important matter.

  - o § 46.2-908.1. Electric personal assistive mobility devices, electrically powered toy vehicles, electric power-assisted bicycles, and motorized skateboards or scooters.
  - O All electric personal assistive mobility devices, electrically powered toy vehicles, and electric power-assisted bicycles shall be equipped with spill-proof, sealed, or gelled electrolyte batteries. No person shall at any time or at any location operate (i) an electric personal assistive mobility device at a speed faster than 25 miles per hour or (ii) a motorized skateboard or scooter at a speed faster than 20 miles per hour. No person shall operate a skateboard or scooter that would otherwise meet the definition of a motorized skateboard or scooter but is capable of speeds greater than 20 miles per hour at a speed greater than 20 miles per hour. No person less than 14 years old shall drive any electric personal assistive mobility device, motorized skateboard or scooter, or class three electric power-assisted bicycle unless under the immediate supervision of a person who is at least 18 years old.

Exhibit A: Dockless Vehicle-Sharing Demonstration Project Service Areas - Spring 2019

Participating Company Assignment: East &/or West County Service Areas

West County Service Area East County Service Area

Dockless vehicle trips are permitted to be started or ended only within the designated Service Areas of the County. Each dockless vehicle company is permitted to operate in one of the Service Areas, based on the terms of their MOU. For detail on boundary lines, streets and other features see the interactive map, which has layers that can be added or deleted: http://mcgov-gis.maps.arcgis.com/apps/View/index.html?appid=1449ea63a4f941b6bc13e8249d520aeb Minor adjustments may be made to the boundary lines in the future. Updated mapping will be provided.

Jurisdictions within boundaries of designated Service Areas not participating.

As of Spring 2019 in the West County Service Area, the municipalities of Garrett Park and Washington Grove are not participating in the Demonstration Project.

No dockless vehicle trips are permitted to be started or ended within these non-participating jurisdictions.

Note: Montgomery Parks Department is adopting their own program for dockless vehicle use in County Parks. Please visit their website for further information: www.montgomeryparks.org.
