

## Kensington Parkway Shoulder Improvements

### DIVISION OF TRANSPORTATION ENGINEERING

100 Edison Park Dr, 4th Floor  
Gaithersburg, MD 20878

**Tim Cupples, P.E.**  
Division Chief

**Sogand Seirafi, P.E.**  
Engineering Services Chief

**Daniel Sheridan, P.E.**  
Design Section Chief

**Marcelo Cortez, P.E.**  
Construction Section Chief

**Eric Willis**  
Property Acquisition Section  
Chief

Please contact the Project  
Manager if you require  
reasonable accommodations.

The Montgomery County Department of Transportation (MCDOT) invites you to attend a virtual public workshop to learn about the Kensington Parkway Shoulder Improvements Project. The Washington Suburban Sanitary Commission's (WSSC) Kensington Parkway Water Main Replacement Project (BRLR5837A15) has been on-going since 2018 and is scheduled for completion in Spring 2021. As the project moves towards completion, the road will need to be repaved which provides MCDOT with the opportunity to redesign Kensington Parkway between Saul Rd and Everett St. The existing roadway features two 12.5' travel lanes with a gravel shoulder that varies between 8'-10' and lacks sidewalks. This project looks to use the WSSC repaving as an opportunity to consider incorporating facilities for people walking and biking as identified in the County Bicycle Master Plan.

At this public workshop, the project team will present an overview of the potential options to provide facilities for walking and biking and input received to date, collect feedback from the community, discuss concerns, and answer any questions from the public regarding this project. We encourage you to attend, share your input on how you would like to see Kensington Parkway redesigned, and provide any suggestions that may better reflect your community's needs. Should you have questions or comments regarding this project at any point, please contact the project manager.

Please register for this virtual public workshop and take a brief survey through this link:
