ASPEN HILL NEIGHBORHOOD GREENWAY PILOT PROJECT

Neighborhood Greenway Description

NEIGHBORHOOD GREENWAYS

Low speed, low volume, residential streets designed to prioritize bicycle and pedestrian travel. Typically include traffic calming devices, pedestrian and bicycle crossing improvements, and are clearly signed.

All images sourced from NACTO

TRAFFIC CALMING

Traffic calming devices lower the speed differential between bicyclists and cars, increasing bicyclist comfort. Devices include; speed cushions, neighborhood traffic circles, medians, and other traffic calming devices.

Speed Cushion

Neighborhood Traffic Circle

Raised Intersection Crossing

CROSSING IMPROVEMENTS

Crossing improvements are implemented to increase the convenience and comfort for users traveling the greenway and can be used to reduce crossing distances at major streets.

Curb Extension

Bicycle Forward Stop Bar

Bike Box at Signalized Intersection

BRANDING / SIGNED ROUTE

Clear route signage and pavement markings are provided throughout neighborhood greenways so bicyclists and pedestrians are aware of neighborhood destinations within biking and walking distance. Clear signage helps direct users to the safest route to their destinations.

Bicycle Route Branding

Bicycle Route Wayfinding

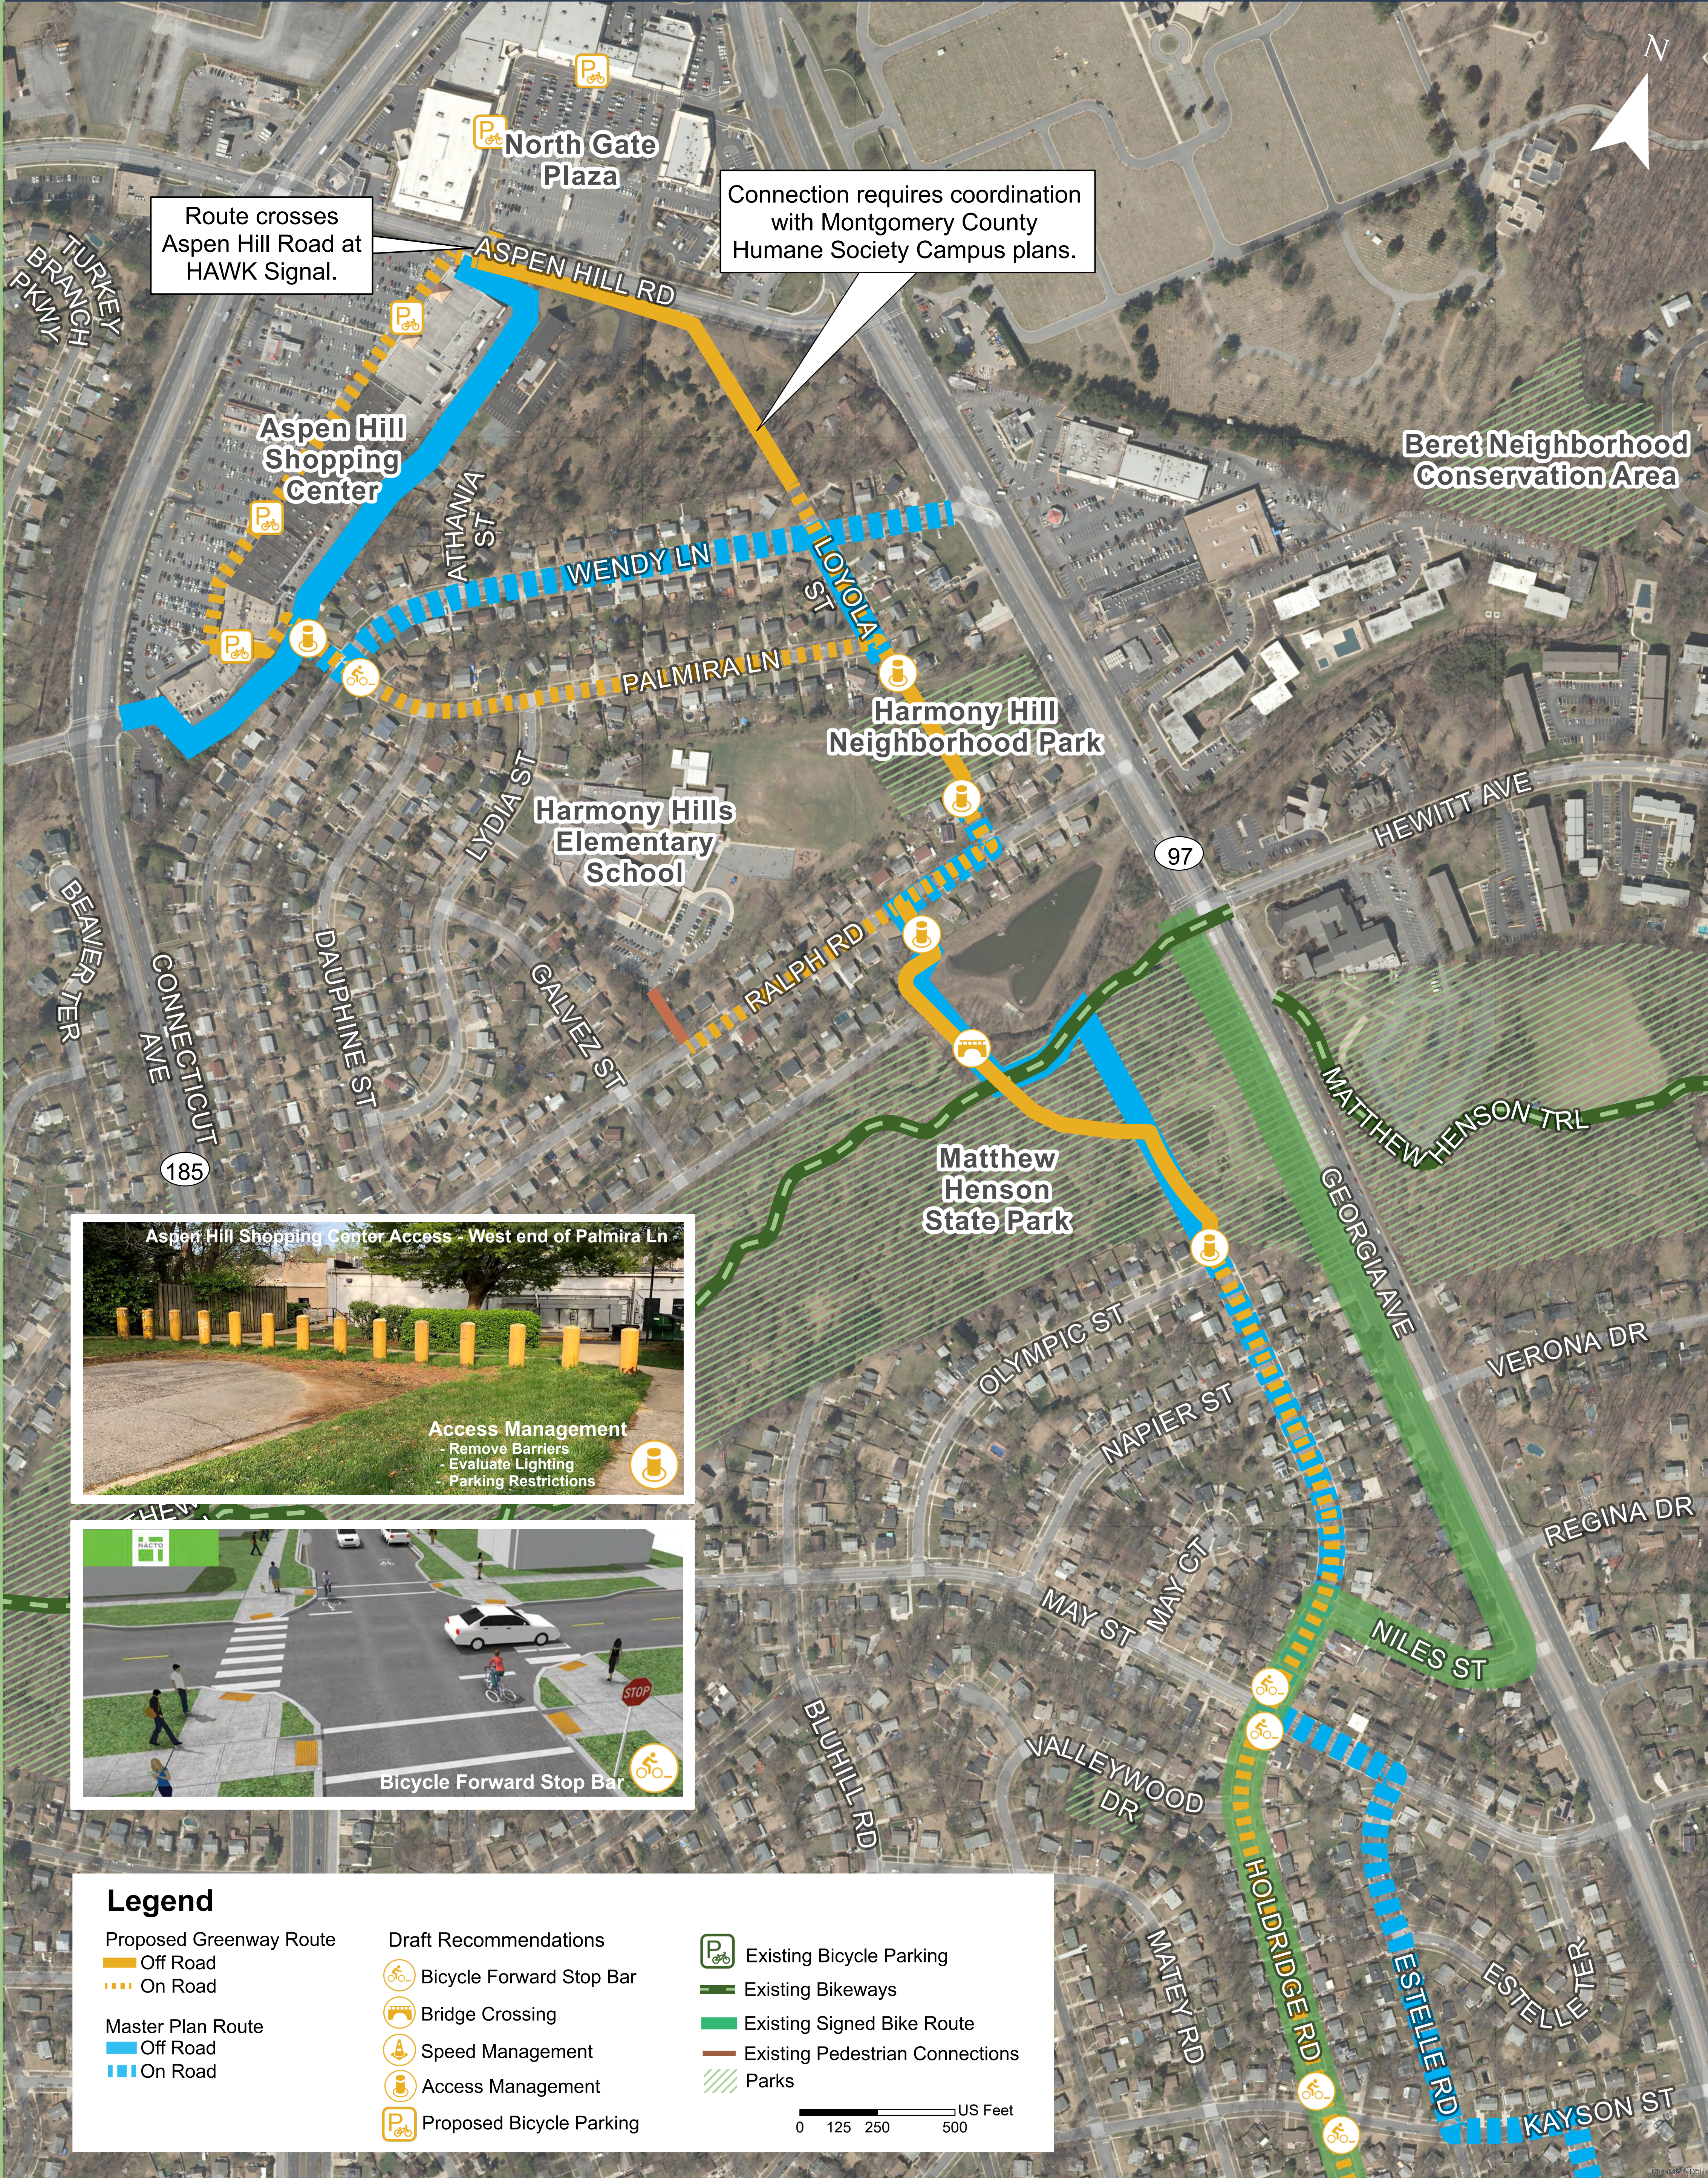

Pavement Markings
