

EMIHS 5-minute Lineup Drill

ALS to BLS downgrade **PROCESS**

Requirement to engage

*OR . . . When are we required
to follow this process?*

For the ALS Clinician:

ALS call type and physical or visual contact

The ALS Clinician must do an **assessment** and base their downgrade decision **on their own assessment findings**.

A BLS Clinician may cancel responding ALS only if:

They have obtained a chief complaint, history and vitals; and,

No high-risk chief complaint or other need for ALS monitoring or treatment exists.

The organization **strongly supports** reasonable downgrade decisions provided they are based on sound judgement and account for all available information and assessment findings. ([FCGO 20-07](#))
