

# EMIHS 5-minute Lineup Drill

## Direct To Triage (DTT) Works!!!

### Did you know...

DTT Enrolled Turnover Time (90PCTL - min) DTT-3

The *EMIHS Section* uses data to monitor **Turnover, Drop and Cycle Times** and works directly with hospital administration to minimize delays. DTT shaves off MINUTES and gets you back in service!

### Maximizing Our Efforts: What can we do?

- 1) Tell the hospital you have a direct to triage patient over the radio
- 2) Transition the patient to a wheelchair
- 3) Go straight to the Charge Nurse
- 4) Notify **EMS700** (or the EMS DO) if told to wait in line for an assessment
