

EMIHS 5-minute Lineup Drill

What to do when a Medical Device **FAILS** during patient care...

1st Priority:
*Continue to care
For the patient*

- Implement Plan B
- Call for additional resources as needed
- Continue patient care

After the call:
*Save everything and
report the incident*

- The device is OOS
- Save **EVERYTHING**, including dirty/ disposable pieces
- Place it all in a biohazard bag

Contact an EMS Duty Officer to guide you through the next steps:

- [EMS Equipment Defect Form](#)
- Defective item and all parts to EMS Logistics
- Obtain a replacement
