Rethink the Workflow!

Transfer of Care and *Unit Clear times* in eMEDS
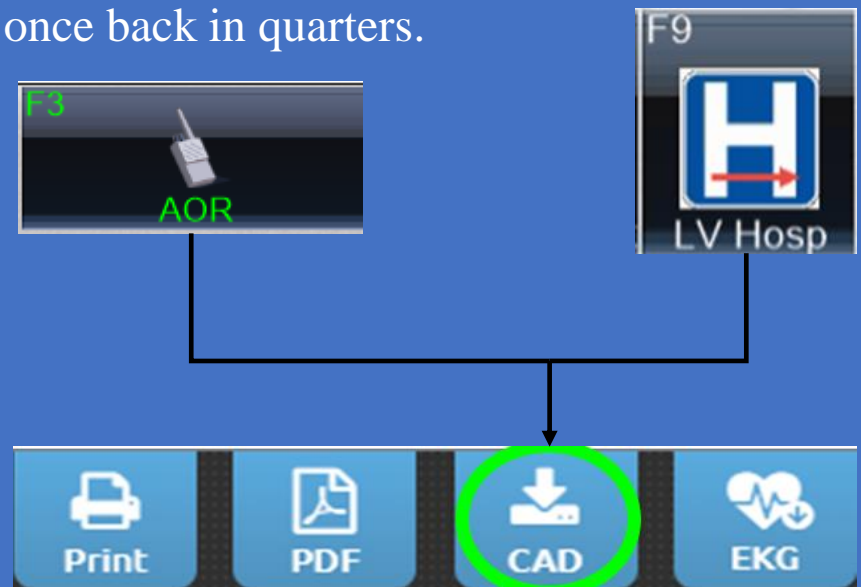

Transfer of Care
- When the patient transitions to a physical hospital resource (bed, wheelchair, or triage), AND
- Report is given to the nurse assuming care

Time stamp this in eMeds. Keep the ePCR with you to document it in real time.

The **Unit Clear** time is best captured by re-downloading the CAD info to eMEDS AFTER clearing on the MDC (FCGO 19-03).

Keep the ePCR with you in the cab and dock it once back in quarters.

Accurate times are important because we share this information with our healthcare partners and MIEMSS to ensure efficient continuity of care. **This helps you!!!**
