

EMIHS 5-minute Lineup Drill

Document Well!

ePCR's are a legal, historical healthcare document and read by healthcare professionals, lawyers, police, family members, patients, and others.

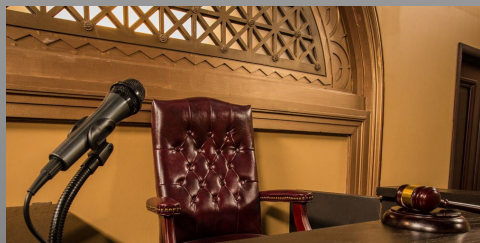

The ePCR narrative:

- Reflects only things relating to the patient and care provided
- Accuracy matters...*times, procedures, medications*
- **Proofread! Grammar! Punctuation!**

The FireApp narrative:

- Scene findings
- Crew actions
- Unusual circumstances
- PPE levels

Imagine in two or three years, sitting on the stand, and all you have is your FireApp Report & ePCR...

**TAKE PRIDE
IN YOUR WORK**

Can you defend what you did or did not do?

Did you know...

...as soon as an ePCR is posted it uploads to the patient's electronic health record

...MCFRS receives approximately 200 PCR requests & 50 subpoenas a month
