

# EMIHS 5-minute Lineup Drill

## Did an Incident involve Mutual Aid?

MCFRS BLS Transport Unit being upgraded by a *non-MCFRS ALS* clinician: you must complete an ePCR. The upgrading clinician will also need to complete an ePCR for their agency\*.

ALS clinician providing ALS care or upgrading an *out-of-county* or *federal transport unit*: you must complete an ePCR. The non-MCFRS transport unit will also need to complete an ePCR for their agency\*.

### \*Not all Federal Stations are considered Mutual Aid

Except for Co 50, all other federal transport units (within MoCo) are part of our eMeds system and we can document on their ePCRs

### Why?

- Each agency needs documentation and a record of the call.
- Ensures all care (medications, procedures, etc.) provided is documented

# Who needs to document??
