

EMIHS 5-minute Lineup Drill

REPATRIATE

**RETURN
TO
SENDER**

To return a patient to a medical facility that provided previous treatment

WHY?

- ✓ Treatment Expediency
- ✓ Coordination of Care
- ✓ Consistency of Care
- ✓ Improved Patient Outcomes

Any hospitalization... especially surgeries!

“(General Patient Care 2.1) If for Priority 2 or 3 patients, the patient has had a hospital admission within the last 30 days the EMS clinician should transport (repatriate) the patient to that hospital . . .”

Coordinate with EMS700 – Honor reasonable requests
