

EMIHS 5-minute Lineup Drill

“Trouble Breathing”
NEEDS **ALS**

BLS Considerations

- ✓ Request **ALS** for dyspnea (There are NO BLS “Trouble Breathing” Dispatches)

- ✓ **BLS** medications for dyspnea, if indicated

- ☐ Albuterol Inhaler (2 puffs) **OR** EMS Nebulized Albuterol

- ☐ EPI Auto-Injector **OR** EMS EPI in Lateral Thigh

ALS Considerations

- ✓ Obtain 12-Lead & monitor for ALL dyspnea that is not from a chronic respiratory disease

- ✓ Transport to CIC when MI/Ischemia is present

- ✓ Use Caution with Beta-Agonists in patients with ischemia **OR** suspected heart failure with hypertension
