Review and Import of Patient History on Repeat Patient Encounters

Imagetrend (ELITE) added the functionality to review patient history on import when using the **Find Repeat Patient** function.

For the best results, search for a repeat patient by trying only the **First Name, Last Name, and Date of Birth** *before scanning the driver's license*. You can still augment the repeat patient information with the D/L scanner after import, as needed.

After searching, confirm that you've found the correct patient using as much information as possible, including the SSN and Patient Address. Then, **look for the Eye button:**

The screenshot shows the 'Repeat Patient Search' interface. At the top, there are search fields for First Name (Bob), Last Name (creed), and Date of Birth (05/21/1953). Below these are fields for Gender, SSN (Exact), SSN (Last 4), and Address. A table below the search fields shows one result for 'Bob Creed' with a date of birth of 5/21/1953, SSN 215632458, gender Male, and address 123 Fake St. Apt APT 5 Willmar, MN 56201. At the bottom right of the table, there are two buttons: an 'Eye' button and a download icon. A red arrow points from the text above to the Eye button.

The Eye button will take you to a screen that allows you to reconcile patient medications, allergies, and history and remove old or incorrect items prior to import. You will still need to add new items per the normal process.

The screenshot shows the 'Patient Medical Record Information' interface for Bob Creed. It features a progress bar with four steps: Current Medications, Medication Allergies, Environmental Allergies, and Past Medical History. The 'Past Medical History' section is active and contains a list of items: Asthma, Vertigo, and Pressure Ulcer, each with a green checkmark. Below the list are 'Select All' and 'Deselect All' links. At the bottom, there are 'Back' and 'Import Selected Data' buttons. A red arrow points from the 'Import Selected Data' button in this screenshot to the 'Import Selected Data' button in the screenshot below.

After review, select **Import Selected Data**

Questions can be referred to Firefighter Ben Brighton or to the EMIHS Quality Improvement Officer, Captain Tim Burns.
