
Reports on Healthy Montgomery Core Measures
For Hospital Community Benefit Service Areas
Montgomery County, Maryland

2008-2011 through 2012-2015

Prepared by the Office of Planning and Epidemiology, Public Health Services
Montgomery County Department of Health and Human Services

October 2017

Methods for Compiling Hospital CBSA Results

This is an updated report of the ‘Montgomery County and Its Six Montgomery County Hospital Community Benefit Service Areas, 2008-2012 through 2010-2014 Results’ based on the 2015 data. In this report, data years of 2008-2011 through 2012-2015 are made available. Lists of zip codes for community benefit service areas (CBSA) of six hospitals are updated based on the 2016 Hospitals’ Community Benefits Narrative Reports hospitals in Montgomery County submitted to the Maryland Health Services Cost Review Commission (HSCRC) – Table 1.

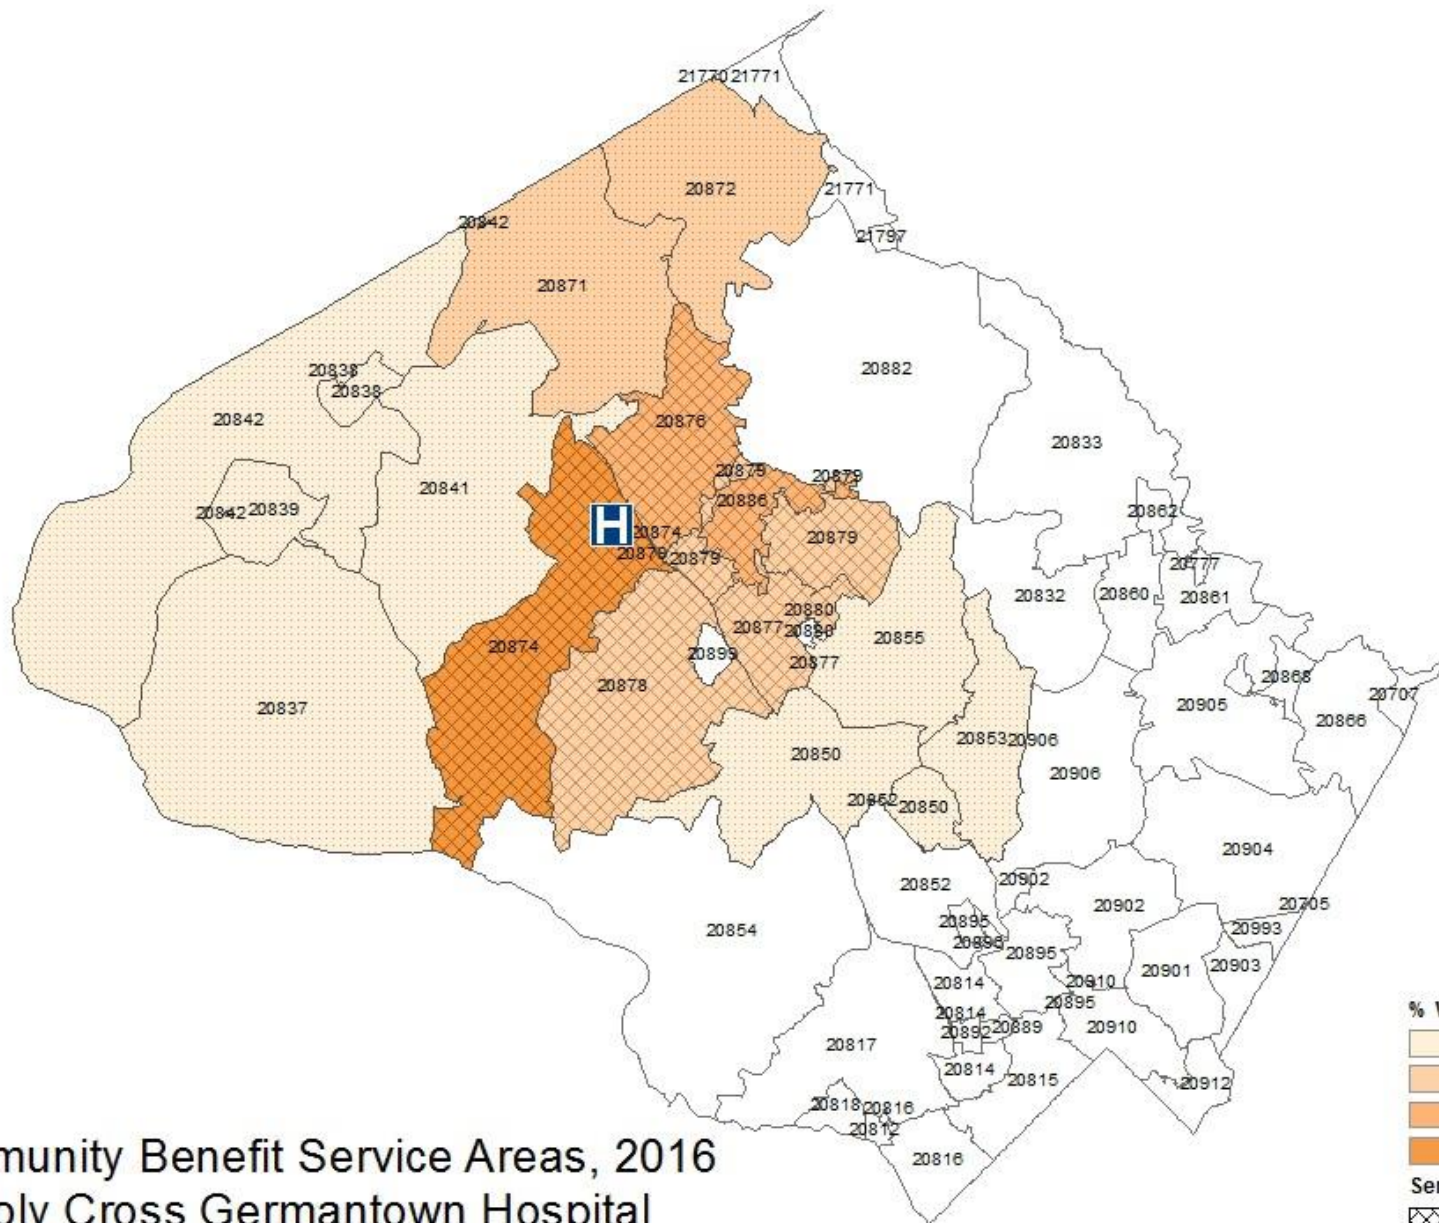

One important update on methodology in this report is to take into consideration of hospitalization discharge volumes for each zip code included in the respective hospital CBSA. Discharge volumes are translated into weights with the sum of 100%, which are applied to corresponding zip codes to be included in the calculation of disease rates of population for the hospital CBSA. The weights for corresponding zip codes included in each of the hospital CBSA are illustrated in the maps following Table 1. Due to the implementation of updated methodology, cautions should be exercised when comparing the results in this report with those from the past report as they may not be comparable.
