# Adding Items After Checkout

There are two ways to add items after checkout. The first, is immediately after the order is placed on the “Order confirmed” page. The second, is the “Orders” tab on the bottom of the page. Select “Add Items” for both and you’ll be returned to the typical shopping experience.

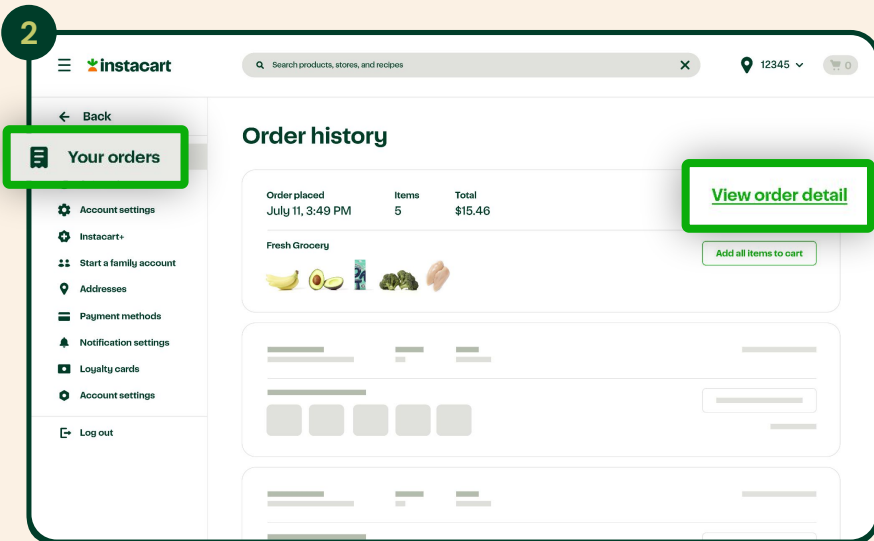

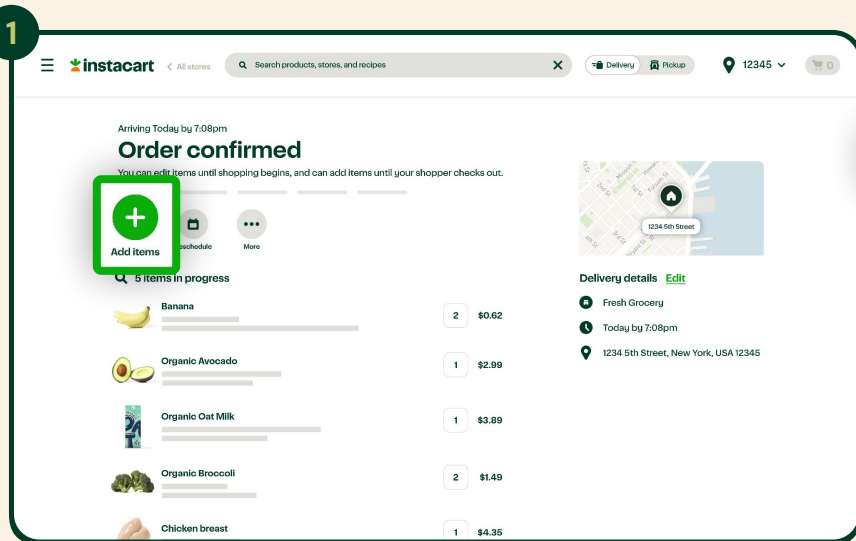

In both scenarios, you will be prompted to “Add to cart.”

The new item(s) will be reflected in your cart.

# Communicating With Shoppers

- ➔ If an item is out of stock (*and you have not already indicated a “specific replacement” or “refund” as seen on slide 11*) your shopper will pick out the best replacement for you and notify you of the selection.
- ➔ Communication with Instacart shoppers happens with the individual who placed the order, not the Care Carts (or gift) recipient, if the gifting feature is exercised.
- ➔ Selecting replacements upfront and offering detailed item instructions (e.g. green bananas vs yellow, brand preference or flavor) will reduce the need for real-time communication.
- ➔ Communication preferences can be set to text, in-app or both.
