SUBJECT: WATER/SEWER CATEGORY CHANGE REQUEST REVIEW – 2022-Q4 REVIEW GROUP

Included with this message is information that identifies five (5) new individual water/sewer service area category change requests (WSCCRs) for your review and comment. This information will also be posted to www.montgomerycountymd.gov/waterworks as a PDF. These requests will be considered as proposed amendments to the County’s Comprehensive Water Supply and Sewerage Systems Plan. I would greatly appreciate receiving your review comments on these requests no later than Monday, August 15, 2022. Please notify me no later than August 8, 2022, if this schedule is not feasible.

DEP will develop and announce a schedule for administrative delegation hearing AD 2022-4, which will include all eligible FY 2022 fourth quarter requests. We will provide a notice of that hearing 30 days prior to the hearing date. We also expect to include the requests recommended below for Council Action to be included with the packet of FY 2022 category change requests anticipated to go to the Council in Spring 2023. We will advise you of the Council’s hearing date and review schedule at that time. DEP’s recommendation process for the requests will be based in part on the review comments your agencies provide.

Note that the listing of the following requests under the administrative process versus the Council process is a preliminary determination and certainly subject to change as they proceed through the review process.

<table>

</tr>
<tr>
<td>Proposed use: Public Sewer Service for the Single Family Home</td>
<td>19-CLO-02A was deferred under Council Resolution 19-521: “Defer action on the request for sewer category S-3 to allow the applicant time to work out an alignment for the sewer hookup from WSSC’s service connection to the existing house. Approval for category S-1 can be considered under the Water and Sewer Plan’s “abutting mains” policy. However, it appears that a change to the existing conservation easement is needed to allow for the service hookup to the house.”</td>
</tr>
<tr>
<td></td>
<td>Subsequent coordination with M-NCPPC and the applicant have resulted in an agreement to use subsurface tunneling for the installation of the service connection, within the conservation easement. This allowed for the advance action cited above.</td>

MEMORANDUM
May 20, 2022

TO: Luis Tapia, Manager, Permit Services Unit, Development Services Group
   Washington Suburban Sanitary Commission

FROM: George Dizelos, Planning Specialist III, Water Supply and Wastewater Unit
   Intergovernmental Affairs Division, Department of Environmental Protection

SUBJECT: Request to Provide a Single Water/Sewer Service Connection

This is to request that WSSC accept and act on an application to provide public sewer service for the following property:

<table>
<thead>
<tr>
<th>Property Address &amp; Identification</th>
<th>Owner – Est. Date</th>
<th>Abutting Main - 200' Tile</th>
<th>WSSCR No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>340 Ednor Rd., Ashton</td>
<td>Rubens Josefino and Maria Matamoros</td>
<td>8” sewer main (#1997-2032A) built: 1999 (WSSC tile 223NW01)</td>
<td>WSSCR 19-CLO-02A W-6 (NC) S-6 to S-1</td>
</tr>
<tr>
<td>Parcel P900, Heart of MD ETC,</td>
<td>Deed: Liber 2165 Folio 22 (January 1956)</td>
<td>House Built: 1967</td>
<td></td>
</tr>
<tr>
<td>acct. no. 01634484 (tax map JT41)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Our records show that the subject property was established by deed in January 1956, prior to construction of the abutting sewer main in 1999. Given this, the property is eligible for a single sewer service connection under the abutting mains service policy in the County’s Water and Sewer Plan.

DEP will address the service area category change amendment cited above, which seeks to change the existing S-6 sewer category to S-1, allowing the provision of public sewer service. However, it will take our office some time to process and approve this request through the administrative delegation hearing process. The owner has indicated a need to expedite the sewer service to this site.

WSSC may install the requested sewer service connection and approve on-site plumbing permits in advance of DEP’s approval of the associated service area category change. The County’s Water and Sewer Plan allows DEP to direct WSSC to provide public service for cases which clearly satisfy the abutting mains policy (Chapter 1, Section IL.G.3.d.).

If you have any questions concerning this request, please contact me at 240-777-7755

Applicant’s Explanation
“I am requesting a sewer category change from S-6 to S-3 under the Potomac Peripheral Policy. My property abuts the Planned Sewer Envelope at an adjoining property. Specifically, the front of my property, 13101 Foxden Drive, abuts 13100 Foxden Drive across the street, which has had sewer service prior to 2002. As a reminder, 13100 Foxden Drive was the property that was not shown correctly on the DEP map but was verified by WSSC billing records.”
