

Happy New Year! Welcome to the Inaugural Edition of the White Flint West Project News!

White Flint West Project News is an email distribution list that provides frequent updates on the White Flint West project on a regular basis. The purpose of this distribution list is to provide updates on the current and future construction activities of the project as the project progresses. Project updates can also be found on the MCDOT Twitter feed, @MoCo_DTE #WhiteFlintWest.

Construction Activities Scheduled to Commence in the week of January 6, 2019

The utility infrastructure relocation and construction which began in August 2018 under the previous contract as Phase 1B continues. The work is scheduled to finish in winter, 2019 and will take place alongside the work designated as Phase 2. Phase 1B work includes temporary daily lane closures on Executive Boulevard between Marinelli and Old Georgetown Roads at the following locations:

- Verizon telecommunications infrastructure construction located in the northbound right lanes of Executive Boulevard prior to the anticipated completion of Old Georgetown Road on February 1, 2019;

- PEPCO electrical construction located in the southbound right lane of Executive Boulevard between Marinelli Road and Banneker Avenue that began on January 2, 2019 with construction duration of six to eight weeks;

The new construction under contract for Construction Management at Risk (CMAR) with Corman Kokosing Construction Company will initially be relegated to Towne Road formerly known as Hoya Street behind the Pike & Rose complex. Please look for MCDOT "NO PARKING" signs, expect probable driving delays, and look for possible pedestrian detours as the contractor conducts field operations between Montrose Parkway and the end of the cul-de-sac of Towne Road. During this early stage, those operations include but are not limited to:

- Equipment mobilization and staging;
- Material delivery and staging;
- Initial excavation;
- Conduit placement and backfilling.

Please note that these will be active work zones so be sure to look for the orange warning signs and flaggers! This initial round of utility relocation and construction has a scheduled duration of three months. White Flint West Project News will update all construction activities.
